PETERSEN ACACIA FLORISTS,

Seed and Plant Catalogue

117. QUEEN ST. BRISBANE
1932-1933

Harry A Petersen
(Manager)

The Noted House for Quality and Service.

PHONES: B 9369: PRIVATE, M 3897

Sufficient Cable and Telegraphic Address: "Acacia, Brisbane."

To Our Customers

This Catalogue has been carefully compiled and contains thoroughly dependable information prepared by an expert Horticulturalist. We forward this copy with our compliments and trust that you will find it both interesting and a useful aid when you are ordering your gardening requirements.

Mr. H. A. Petersen

Our Manager, Mr. H. A. Petersen has, for the past 30 years, been connected with Seed, Plant and Flower business in Brisbane. He possesses that matured knowledge of Horticulture which can only be gained by long experience. This knowledge and advice is willingly placed at the disposal of Amateur Gardeners and all interested in Horticulture.

Floral Department

Our Floral Department is under the control of skilled Floral Artists, capable of giving the utmost satisfaction to clients, and of correctly interpreting their wishes. Wedding and Presentation Bouquets are made on shortest notice. Floral Wreaths, Crosses, and other floral emblems range from as low as 10/6. Delivery is free to all parts of the city and suburbs.

General Information:

Terms & Discount

Customers who have not got a ledger account with us should send cash with order. Attention to this detail will save unnecessary correspondence. Ledger account customers are allowed 30 days with a discount of 2½% for payment within that period. When remitting, send Bank Draft, Cheque, or Money Order. Postal Notes or Stamps accepted ONLY for small amounts. All cheques must carry exchange (6d. for Queensland Cheques).

Small Orders

These should always be accompanied with remittance as our low charges do not allow of sending accounts.

How to Order

Write your name and address plainly and IN FULL. Give definite instructions whether your parcel is to be sent by rail, steamer or post.

Packing

All orders are packed by experienced Mail Order specialists. When despatch office accepts our parcels and signs for them "IN GOOD ORDER" our responsibility for Loss, Damage, or Miscarriage, ceases. Sacks, Bags, or Cases charged for at lowest market rates.

Delivery

We deliver free in city and suburbs, and arrange for despatch of country orders in any way clients desire. All orders sent out ONE DAY after receipt of instructions.

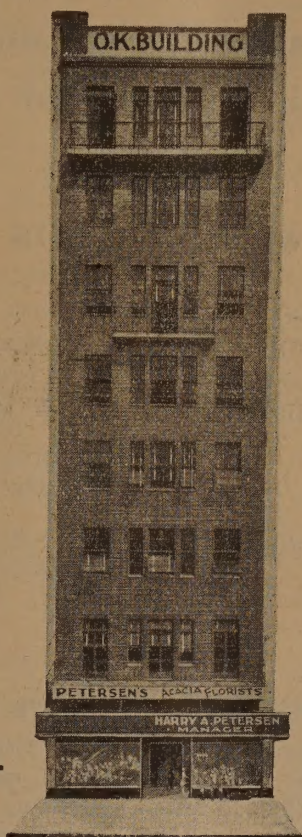

With Compliments,

Petersen's Acacia Florists.

We have only One City Retail Store.

CHOICE FLOWER SEEDS.

The following list of Flower Seeds will be found comprehensive, in that it contains assortments of all the leading varieties in general cultivation. We have added to the list many varieties enquired for by our clients throughout the Commonwealth, and shall be glad to supply any kinds not included in this list at current prices, if procurable, and also included in the list are a number of the latest novelties, and we believe they will quickly prove their worth.

Annuals bloom the first year from seed and then die. Biennials bloom the second year from seed and then die. Perennials usually bloom the second year

from seed, and continue to grow and bloom for years. Biennials and Perennials, if sown early in spring, may bloom the first year.

Abbreviations:—H.A., Hardy Annual; H.H.A., Half Hardy Annual; H.B., Hardy Biennial; H.P., Hardy Perennial; Cl., Climber; Tr., Trailer; G.P., Greenhouse Perennial.

Our seeds are procured from the leading sources of supply throughout the world—no expense being spared to secure and supply the finest strains obtainable.

ANTIRRHINUM.
(Tom Thumb).

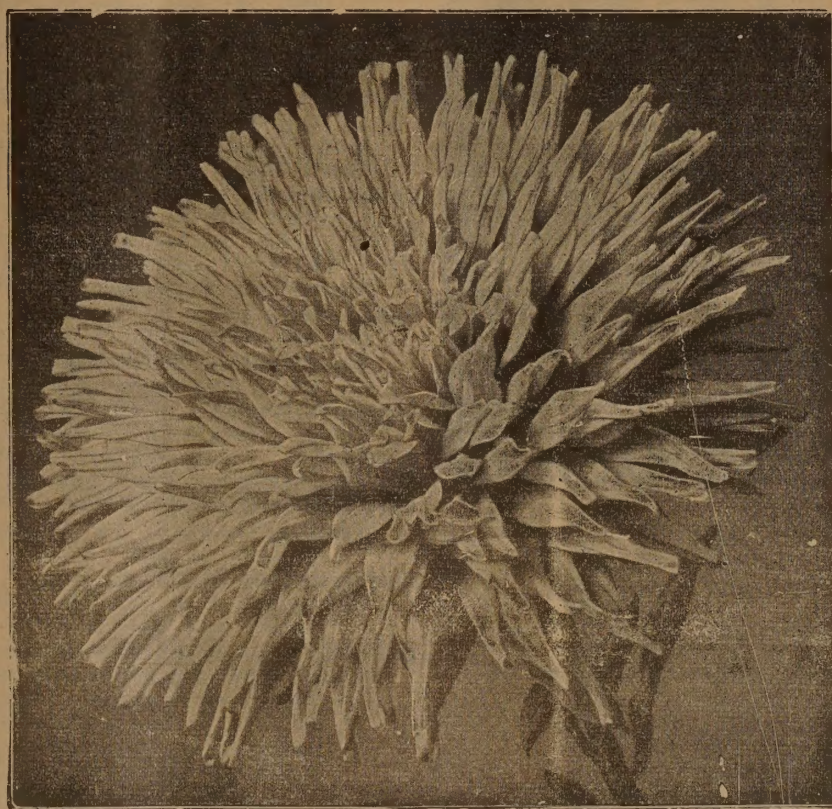

AQUILEGIA
(Columbine).

WONDERFUL ASTERS

Imported from America exclusively for the
"Acacia" Florists.

The Americans, through a long process of Hybridization and culture, have created the finest Asters produced anywhere in the world. The many glorious colourings of these plants have, thanks to the Americans, been further enhanced by the wonderful size to which they can now be grown. We have made exclusive arrangements to import Giant Asters from America. We have stocks of all the imported varieties named below and can make immediate delivery. Make your selection, while stocks last.

Pentstemon.—

Large Flowering Hybrids.—Very choice. 6d. pkt.

PETUNIA.

Petunia.—H.H.A.—

Our strains of Petunias have become famous throughout the Commonwealth for size, range of brilliant colour and substance. We devote much care to the selection of the seed plants, and have the utmost confidence in offering the following kinds:—

Giant Ruffled.—A glorious strain, vastly better than Giants of California. Flowers of enormous size, beautifully marked, and of brilliant colouring. 2/6 pkt.

Giants of California (Double).—Large flowers of good substance and colour. 2/- pkt.

Rosy Morn.—Rosy pink, paler centre dwarf, compact growth. 6d. pkt.

Choice Mixed. 6d. pkt.

Window Box Strain.—A new specie, dwarf in habit of growth, excellent colourings; most serviceable for window-box cultivation. 1/- pkt.

PETUNIA.

950 Star of California (Novelty 1931).—This New Introduction of the Balcony type of Petunia is bred with extra long branches for window boxes and hanging baskets. The flowers are velvety violet with a touch of crimson, starred with five pure white blotches. We have seen these growing in window boxes, and the effect is most dazzling and pleasing. Price, per pkt., 1/6.

Phacelia Campanularia.—H.A.—Deep H.P. Cl.—Curiously curled yellow and lilac flowers. 9d. pkt.

Phlox Drummondii Grandiflora.—H.A.—

Our strain of this popular annual is of very superior quality, equal to any in commerce. The flowers are large, and the colours brilliantly beautiful—

Grandiflora.—Finest mixed. 6d. pkt.

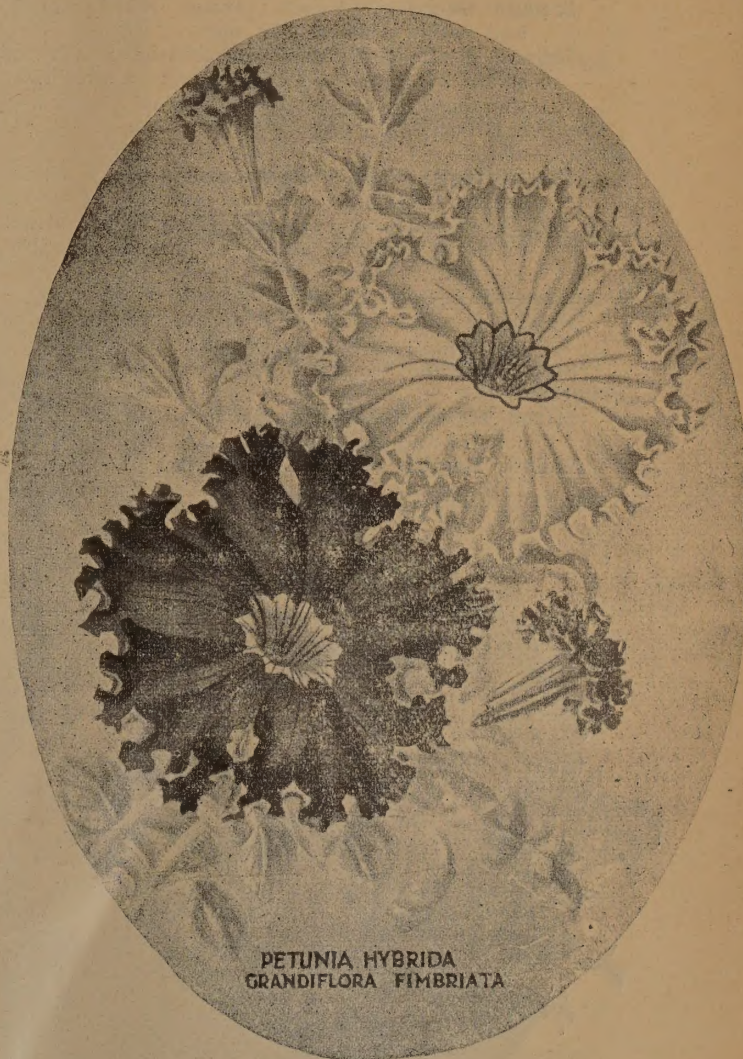

Phlox—Perennial (Decussata).—Extra, selected from named varieties. 1/- pkt.

Polyanthus.—H.P.—

Mixed Hybrids.—Finest strain. 1/- pkt.

Polyanthus Primrose (Bunch Flowered Primrose).—H.P.—

Large Flowered Hybrids.—Very choice. 1/6 pkt.

PETUNIA HYBRIDA
GRANDIFLORA FIMBRIATA

NOVELTY ICELAND POPPY.

Gartref.—A unique strain of Iceland Poppy obtained as the result of re-selection. The majority of the blooms have dark-edged petals. The flowers are large in size, many blooms measuring five inches across. The colour tones range as follows:—Cream, Biscuit, Fawn, Salmon-Apricot, Yellow, Old Gold, Pink, Rose and Bronze. Price, per packet, mixed, 1/6.

POPPY. (Iceland).

Grendon's special selected hybrids. This particular strain excels all other varieties, producing blooms of magnificent quality on strong wiry stems. 1/- pkt.

Iceland Sunbeam.—Select strain, chiefly tango and yellow shades. 6d. pkt.

Iceland Pink Perfection.—Rigorously re-selected strain of Coonara Pink, and it is absolutely the finest strain of Pink Iceland Poppies in existence. 1/- pkt.

Poppy.—H.A.—

The Shirley (Wilk's Re-selected).—Very choice shades. 6d. pkt.

The Queen (Double Shirley).—Very select strain of lovely flowers, about 70 per cent. double. 1/- pkt.

Portulaca.—H.A.—

Double Mixed.—Very choice; very showy in borders or rockeries. 6d. pkt.

Single Mixed. 6d. pkt.

Primrose.—H.P.—

Mixed Hybrids.—A magnificent strain of lovely colours and large blooms. 1/- pkt.

Yellow, English (*Primula Vulgaris*). 1/- pkt.

Primula.—Greenhouse Perennial.—

Sinensis Pimbriata Gigantea.—Giant Chinese Primula. A superb strain of large-flowered hybrids of unsurpassed quality. 2/6 pkt.

Obconica.—Choice hybrids; a very choice selection of lovely shades and big flowers. 1/6 pkt.

Primula Malacoides.—H.P.—Splendid for winter bedding.

Princess Mary.—Deep rose pink. A great improvement on the original type. 1/6 pkt.

Malacoides.—Lavender (the old type); a choice strain. 6d. pkt.

Pyrethrum.—H.P.—

Aureum Golden Feather (Exhibition Border). 6d. pkt.

Ranunculus.—H.P.—

Giant French.—An assortment of brilliant colours; large blooms on stout stalks. 6d. pkt.

Giant Asiaticus.—Large flowers of the most varied colours on stems 1½ to 2 feet; very vigorous. 1/- pkt.

Salpiglossis.—H.A.—

Grandiflora.—Large flowered, choice mixed. 6d. pkt.

Emperor.—Upright habit; beautiful mixed colours. 6d. pkt.

Salvia.—H.P.—

Bonfire.—Bright scarlet; withstands the hottest sun. 6d. pkt.

Scabious.—

Annual Varieties:—

Azure Fairy.—Rich pale blue; choice. 6d. pkt.

Peach Blossom.—A beautiful shade. 9d. pkt.

Schizanthus (*Butterfly Flower*).—H.A.—

Hybridus Grandiflorus.—Choice mixed; very attractive and useful. 6d. pkt.

Wistonensis.—This is the finest type; compact habit and rich colours. 9d. pkt.

Statice (*Everlasting*).—H.P.—

Caspia.—Pale violet flowers in elegant sprays. 1/- pkt.

Latifolia.—Dainty mauve. 1/- pkt.

Rosea Superba.—Rich rose pink. 6d. pkt.

True Blue.—Rich deep colour. 6d. pkt.

NEMESIA
(*Strumosa Grandiflora*).

When in doubt about the selection of seeds or plants you wish to plant, let us do the selecting. We'll serve you right.

Our Mr. H. A. Petersen gives his personal attention to all inquiries. His experience in the Seed and Plant trade enables you to obtain the best horticultural advice free of charge. Consult him.

STOCK.

Stock.—H.A.—

Beauty or Early Flowering Varieties:—

- Beauty of Nice.—Flesh pink. 6d. pkt.
- Crimson King.—Glowing crimson. 6d. pkt.
- Light Violet.—Lovely shade. 6d. pkt.
- Mont Blanc.—Pure white. 6d. pkt.
- Queen Alexandra.—Rosy lilac. 6d. pkt.
- Summer Night.—Dark blue. 6d. pkt.
- Salmon King.—Light salmon rose. 6d. pkt.

Ten-Week Varieties:—

- Giant Perfection.—A magnificent strain, producing large spikes of bloom in brilliant colours:—Bright Pink, Blood Red, Light Blue, Rose, Canary Yellow, Purple, White. Each 6d.
- Collection of 6 Choice Varieties. 2/6.

Choice Mixed... 6d. pkt.

SUNFLOWER.

Sunflower.—H.A.—(Helianthus).—

Large Russian.—Large golden flowers, with black centres. 6d. pkt.

Miniature.—Dwarf, about 3 feet; lovely golden black-eyed flowers; excellent for cutting. 6d. pkt.

Red Flowered.—Distinct band of purplish red surrounds a dark centre; golden tipped. 6d. pkt.

Fistulosus Globosa.—Large double flowers, rich golden yellow. 6d. pkt.

Dwarf Double.—Golden yellow. 6d. pkt.

STOCK (Giant Perfection).

Our Mr. H. A. Petersen gives his personal attention to all inquiries. His experience in the Seed and Plant trade enables you to obtain the best horticultural advice free of charge. Consult him.

When in doubt about the selection of seeds or plants you wish to plant, let us do the selecting. We'll serve you right.

Thalictrum.—H.P.—

Dipterocarpum.—A very pretty perennial, both flowers and foliage possessing remarkable beauty. The flowers are a dainty shade of mauve, with lemon yellow anthers. They are produced in long, graceful sprays. The foliage resembles maiden hair fern, and when cut, both flowers and foliage are exceedingly ornamental. 1/- pkt.

Verbena.—H.P.—

Mammoth Special.—A magnificent large flowered strain. There is nothing better. 6d. pkt.

Blue Shades.—Make lovely borders. 1/- pkt.

Pink Shades.—Lovely colours, pale and bright. 1/- pkt.

Scarlet Defiance.—A bright fiery scarlet; most useful and showy. 1/- pkt.

Viola.—H.P.—

Mixed Colours, from a noted strain. 6d. pkt.

Wallflower.—Single.—H.P.—

Acacia Special Mixture.—A splendid assortment of choice colours. 6d. pkt.

Whitlavia.—H.A.—

Grandiflora.—Lovely blue flowers; about 12 inches. 6d. pkt.

ZINNIA.

Zinnia.—H.A.—

GIANT DAHLIA FLOWERED.

The following separate shades can be supplied:—

Giant Dahlia Flowered.—Of comparatively recent origin, these Zinnias have become widely known because of their outstanding qualities. The flowers are of immense size, most radiantly beautiful colours, and produced on long, strong stems. Infinitely superior to the Robusta or Mammoth types. 1/- per pkt.

Canary Bird.—Delicate shade of primrose. 1/- pkt.

ZINNIA.

COREOPSIS
(Grandiflora).

Crimson Monarch.—Easily the largest and best of the reds, often 8 inches in diameter. 1/- pkt.

Cerise Queen.—Very bright striking colour, entirely distinct from any other. 1/- pkt.

Dream.—Very attractive and distinct shade of deep lavender, changing to purple. 1/- pkt.

Exquisite.—The most pleasing of all true Dahlia form, and of large size; colour light rose, with deeper centre. 1/- pkt.

Golden Dawn.—Rich golden yellow rather paler than Golden State and without orange tints; enormous size and perfect shape. 1/- pkt.

Golden State.—Golden yellow, shading to orange. 1/- pkt.

Illumination.—Deep rose self; striking colour. 1/- pkt.

Lemon Beauty.—Golden yellow on brown, decidedly a pastel shade; very choice. 1/- pkt.

Meteor.—Deep glowing red, the darkest of the reds; fine form and good depth of petal; large size and free. 1/- pkt.

Oriole.—Bright, glistening orange shaded liquid gold. 1/- pkt.

Scarlet Flame.—Rich dazzling orange scarlet. 1/- pkt.

Choice Mixed, 1/- pkt.

Collections of Giant Dahlia-Flowered Zinnias.—

12 choice varieties (our selection), all different. 10/-. 6 ditto, 5/-.

Robusta or Mammoth—

A good strain of many pretty shades. Flowers a little smaller and habit less robust than the flowered species.

Choice Mixed. 6d. pkt.

Special List of Spencer Type of Early Winter Flowering SWEET PEAS.

The undermentioned varieties of Sweet Peas are a few of the many species we offer for sale. This list embraces the best show and garden varieties, and are grown, by special arrangement, by one of the most reliable growers in Australia.

Particular attention is taken to keep each variety true to name, and our customers can rely on our supplies being always fresh, and the varieties up-to-date.

Albury Maroon.—A deep maroon, and a very popular variety. Highly recommended.

Pink Flaked.—A light pink flake, producing blooms freely, with stems containing plenty of fours.

All White.—Produces up to four gigantic blooms on long stems. Highly recommended.

Mott's Picottee.—A beautiful silvery white, with a well defined edging of pink.

Mrs. H. C. Mott.—Purple Blue, standard with blue wings, large and waved; strong grower, blooms produced on long, stiff stems.

Early Pink Cherokes.—A variety of surpassing beauty; colour, pink, suffused on deep cream ground; vigorous, robust habit.

Igara.—Fine large deep blue, splendid form. Extra special.

Mott's Frilled Pink.—A pure soft pink, very heavily frilled and producing many double standards. Extra special.

Deep Cream.—Much the deepest cream, ideal form, very waved, and of good substance. The best cream.

A. J. Quanell.—A beautiful scarlet, good form, of large size. Excellent for show purposes.

Mabel de Rose.—Colour, beautiful mauve, producing four giant blooms on long, stiff stems. Highly recommended.

Blue Bird.—A beautiful medium blue variety; full flowering and producing exquisite blooms on long stems.

Albury Beauty.—One of the best of its colour, which is a very fine soft salmon; of large size and splendid form.

Mott's Grey Flaked.—A chocolate flake, on a grey ground.

Painted Finch.—A beautiful mauve, perfect form, free flowering, and of good character.

Donald J. Coghill.—A magnificent variety; white ground, flaked with rosy salmon.

A. J. Simpson.—White, tinted blush.

Elfin White.—One of the best whites, producing freely blooms of exhibition quality.

Improved Pink.—Deep bright pink, good habits; splendid form and texture. Most suitable for show purposes.

Zyris White.—A beautiful white, producing very fine blooms, often five on a spike.

Grenadier.—A real good scarlet, first-class.

Mott's Creamy Pink.—Good for exhibition and also first class for cut flowers; colour, white, overlaid with pink.

Mott's Champagne.—A splendid variety; colour, real champagne.

Mott's Flesh Pink.—Soft flesh pink.

Elfin Mid Pink.—A lovely shade of pink.

Fascination.—Light heliotrope, very dainty.

Blue Flaked.—Standard white flaked with blue. A very showy and free flowering variety.

Rose Pink.—A true rose pink, as the name implies.

Mott's Plum.—Colour, rich plum maroon; one of the largest sweet peas grown. A popular favourite.

Giant Rose.—An exquisite shade of rose pink, particularly suitable for exhibition, the blooms being produced on stiff, long stems.

Mrs. Calvin Coolidge.—Salmon pink.

Sweet Lavender.—A lavender blue shade.

Early Bright Light.—Flaming scarlet, most beautiful blooms, and sun proof.

Heliotrope Flaked.—An entirely new flake, white ground, striped with heliotrope. Much waved, plenty of fours.

Concord Purple.—A very fine purple.

Mott's Crimson.—A rich crimson red, indispensable on account of its glowing colour and splendid qualities of size, substance and freedom of flowering.

Silver Blue.—Colour a delicate shade of true lavender blue; blooms produced on long, sturdy stems. Exquisite.

Versailles.—A beautiful pale blue lavender.

Veronique.—Rose pink, of extra good quality.

Bule Picottee (or Agincourt).—Edged with slightly flushed pale violet. A very fascinating variety, which is in good demand.

Eva Warbrick.—Dark maroon.

Daisy Motte.—Pure white, strong grower, and very free flowering.

Vulcan.—A superior shade, brighter than Neverflame, and much superior for general garden cultivation.

Asta Ahn.—A beautiful shade of lavender, a colour much in demand.

Windsor.—A very large pink.

Burpee's Orange.—A clean, pure orange-self, and most suitable for exhibition or cut flower purposes. One of the best orange shades to date.

Acacia Mixture.—This mixture includes varieties of strong growth and free flowering habit. An ideal mixture for the ordinary amateur gardener. Especially suited for massing. Price, 6d. and 1/- per pkt.

Queen of Karkoo.—A very fine variety, and strong grower. A most fascinating shade of lavender; highly recommended.

PETERSEN'S ACACIA FLORISTS, O.K. Building,

Duplex Gem.—A pea of rare beauty. The blooms are large and produced on long stems. Colour light pink.

Duplex Pioneer.—A new introduction of excellent quality. Strong grower, producing exquisite blooms of a deep pink shade.

Petunia Flaked.—Colour rosy pink.

Tally Ho.—A most beautiful deep scarlet, large blooms, borne on long, stiff stems.

Early Oriental.—Colour deep cream, blooms of excellent quality. A pea of perfect beauty.

Early Springsong.—A most delicate pink of exquisite quality, blooms large and borne on long, wiry stems.

Early Sunray.—An exquisite shade of salmon pink, a colour of pleasing beauty, and much admired.

Icicle.—The best white.

Valetta.—A most beautiful lavender.

Mott's Grey Flake.—A chocolate flake on a grey ground.

OUR SPECIAL.

PETERSEN'S O.K. SPECIAL MIXTURE.

This mixture incorporates 110 distinct show and exhibition varieties and of specially selected seed. None better procurable in the Commonwealth. The blooms are large and borne on long stems, many varieties producing four large blooms on a stem. Try a packet of these beauties. Price, 1/6, 2/6, and 5/- per packet.

VEGETABLE SEEDS.

We submit that our Vegetable Seeds are of unsurpassed quality. Each kind has been carefully selected with a view to supplying only the best in each section. We obtain our supplies from the most reliable sources, and are satisfied that better cannot be got.

COLLECTION OF VEGETABLE SEEDS.

The undernoted collections of Vegetable Seeds are of high grade quality. They are carefully prepared with a view to supplying assortments of Vegetable Seeds which will give a succession of choice vegetables throughout the year. They are made up on a generous scale as regards value, and we strongly recommend them to those of our clients and friends who may not be conversant with the needs of the vegetable garden, so far as seeds are concerned.

COLLECTION A—"THE HOME," Price 4/6. (Post free).

Contents:—1 pkt. each: Beet (Red), Beet (Silver), Cabbage, Carrot, Lettuce, Onion, Parsnip, Parsley, Radish, Spinach, Turnip.

COLLECTION B—"THE STATION," Price 7/6. Post Free.

Contents:—1 pkt. each: Beans (French), Beet (Red), Beet (Silver), Cabbage, Carrot, Cauliflower, Celery, Cucumber, Leek, Melon, Onion, Parsley, Parsnip, Pumpkin, Radish, Spinach, Tomato, Turnip, Vegetable Marrow.

COLLECTION C—"THE ACACIA," Price 12/6. Post Free.

Contents:—1 pkt. Beans (French), 1 pkt. Beans (Broad), 1 pkt. Beet (Eclipse), 1 pkt. Beet (Silver), 1 pkt. Brussels Sprout, 1 pkt. Carrot, 2 pkts. Cabbage (2 kinds), 1 pkt. Cauliflower, 1 pkt. Celery, 1 pkt. Cucumber, 1 pkt. Cress, 1 pkt. Leek, 1 pkt. Lettuce, 1 pkt. Melon (Rock), 1 pkt. Melon (Water), 2 pkts. Onions (2 kinds), 1 pkt. Parsley, 1 pkt. Parsnip, 1 pkt. Peas, 1 pkt. Pumpkin, 2 pkts. Radish (2 kinds), 1 pkt. Squash, 1 pkt. Spinach, 1 pkt. Tomato, 1 pkt. Turnip, 1 pkt. Swede Turnip, 1 pkt. Vegetable Marrow.

ARTICHOKE.

Green Globe.—Large globular heads. 6d. pkt.
Jerusalem Artichokes (tubers only). 1/2 lb. Postage or freight extra.

ASPARAGUS.

One ounce will sow 40 feet (cultural directions on request).

Connover's Colossal.—Very popular. 6d. pkt.

Roots.—Connover's—Extra strong, May to September: 2/6 doz.; 15/- 100.

BROAD BEANS.

BEANS, FRENCH.

(1 lb. will sow 70 ft.).

Seeds should be sown in drills 2 feet apart and about 1-2 inches deep (or in heavy soil, somewhat less), and about 4 inches between the seeds. Mulch the ground if weather gets dry, and water freely.

Bounteous (New).—Compact grower and heavy cropper, with longer and stronger stems, which carry the crop well off the ground. 1/- pkt.

Canadian Wonder.—This is the best and most generally used of the Dwarf type. Per lb., 1/6; 6d. pkt.

Burpee's Stringless.—A dwarf variety of compact growth; very fleshy and absolutely stringless. 2/6 lb.; 6d. pkt.

BEANS, LIMA.

(1 lb. will sow 80 ft.).

These should not be sown before the end of October. They resemble Broad Beans, somewhat, in flavour, and are more nutritious.

Bush Lima (Henderson's).—Dwarf variety, about 18 inches high; very productive. Per lb., 2/6; 6d. pkt.

Tall Lima.—Very fine variety, large, well-filled pods, and of excellent quality. Per lb., 2/6; 6d. pkt.

BEANS (Butter).

Startler (Dwarf Butter Bean).—Stringless, and the finest Golden-podded variety. Bears abundantly over a long period; a variety of much merit. Per lb., 2/6; 6d. pkt.

Pencil Pod Wax.—Pods round and fleshy, yellow when ripe, absolutely stringless. 6d. per pkt.; 2/6 per pint.

Kidney Wax.—This particular variety is a most excellent production, pods flat, fleshy, and entirely free from strings. 1/- per pkt.; 3/- per pint.

BROAD BEANS.

(1 lb. will sow 50 ft.).

Plant in rows 3 feet apart, and about 9 inches between each Bean. When in bloom, pinch out tops to encourage setting.

Leviathan.—A long-podded variety of finest quality; second to none. Per lb., 1/6; 6d. pkt.

Windsor Broad.—The well known variety with broad pods, heavy cropper. Per lb., 1/6; 6d. pkt.

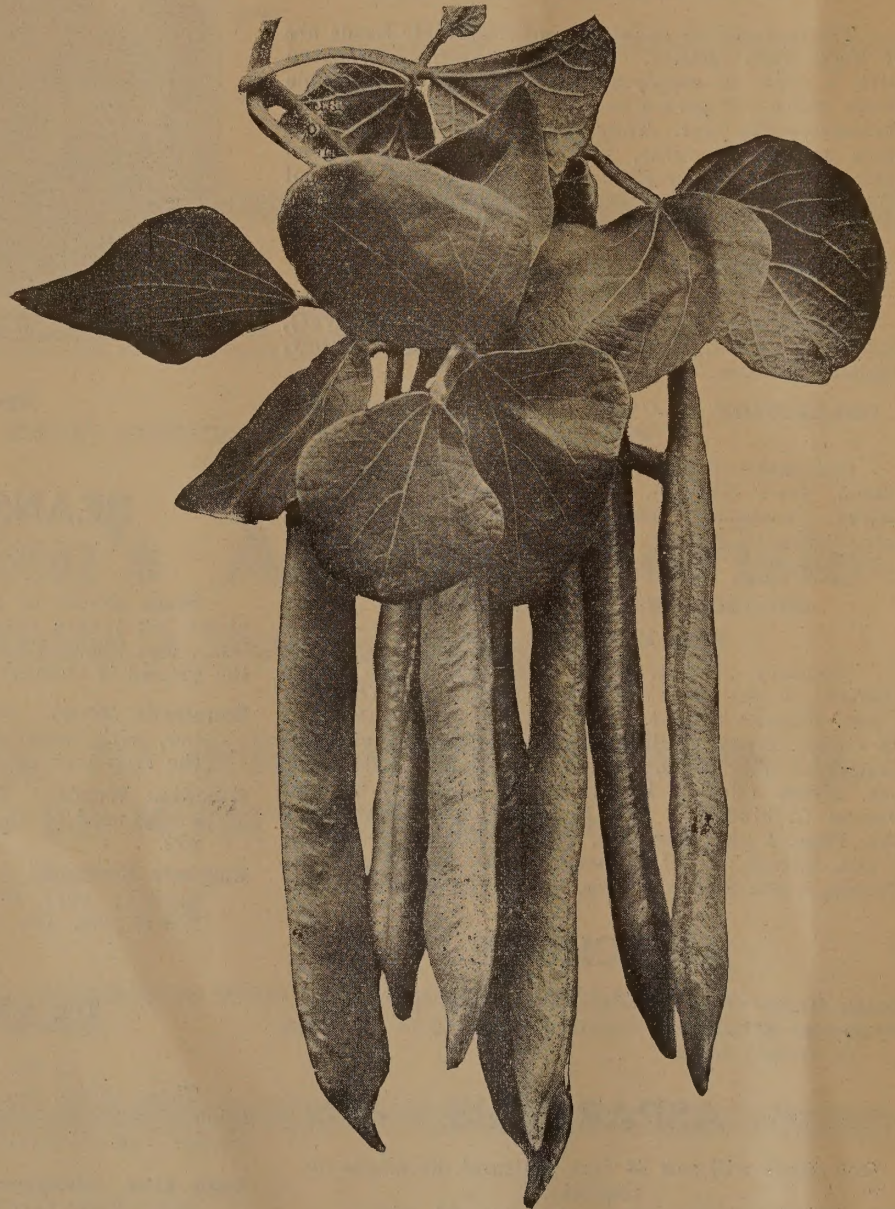

BEANS, TONGAN (Runner).

A perennial climber producing huge quantities of large, flat beans, which are used like French Beans. The quality is excellent, and a few plants will yield a nine-months' supply for a small family. 6d. pkt.

are the most
Expensive in
the long run.

—
Our Motto is Quality

BUTTER BEANS.
(Golden Wase).

POLE or CLIMBING BEANS.

(1 lb. will sow 80 feet).

Sow in rows 4 feet, and 6 inches between the seeds. Should be supported by sticks as soon as possible, or grown alongside a fence.

Epicure.—The best of all the Runner Beans for this country. Heavy cropper, stringless, excellent flavour. Per lb., 2/-; 6d. pkt.

Emperor Scarlet Runner.—Unequalled by any Scarlet Runner; very heavy yielder of large pods of 15 inches long. Per lb., 2/-; 6d. pkt.

Kentucky Wonder.—A very superior climbing variety of French bean, absolutely stringless, prolific and delicious flavour. 2/- lb.; 6d. pkt.

BEET.

(1 oz. will sow 50 ft.).

Sow in drills 18 inches apart, and thin out when large—arrange to 8 inches apart. Transplant quite readily.

Blood Red.—Well known long variety. 1/- oz.; 6d. pkt.

Crimson Globe.—One of the best turnip-shaped Beet. 1/- oz.; 6d. pkt.

Eclipse.—A first-rate turnip variety. 1/- oz.; 6d. pkt.

Silver, Giant Lucullus (Curled Leaf).—Improved variety, large, good flavour, nice colour. 1/- oz.; 6d. pkt.

Obelisk (Half-long).—A beet of very special quality, rich in colour, of very fine flavour. 1/- oz.; 6d. pkt.

Crosby's Egyptian.—A flat turnip rooted beet, blood red. Very early. 1/- oz.; 6d. pkt.

BORECOLE, OR KALE.

(1 oz. will sow 50 feet, or an ordinary sized bed).

Sow in sheltered position, and when seedlings are strong enough to handle, transplant into rows 3 feet apart and 18 inches between the plants. The soil should be deep and strong.

Dwarf Green Curled.—Very fine. 1/6 oz.; 6d. pkt.

BROCCOLI.

(1 oz. will sow 50 feet row or an ordinary sized bed).

Sow in beds, and when strong enough, plant seedlings in well-dug, fairly rich soil. Plants should be about 2 feet apart.

Adam's Early White.—A good variety, large headed. Per oz., 2/-; 6d. pkt.

Knight's Protecting.—Well known variety of superior quality. Per oz., 2/-; 6d. pkt.

BRUSSELS SPROUTS.

(1 oz. will sow about 6 sq. yards for transplanting).

Plant in rows 2 to 3 feet apart, and about 2 feet between each plant.

London Market.—A very abundant producer of heavy sprouts. Per oz., 1/6; 6d. pkt.

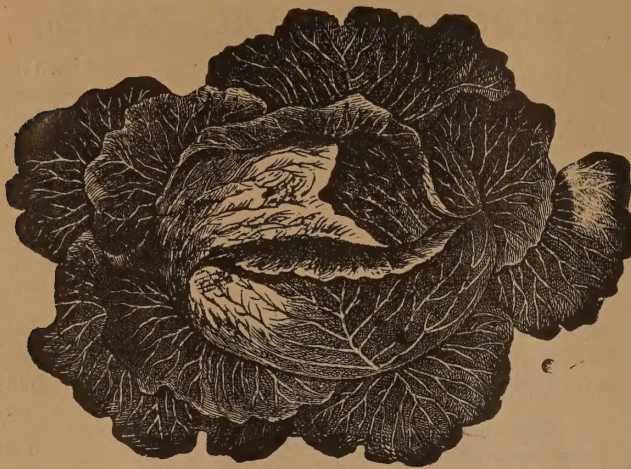

CABBAGE.

(Large Brunswick).

Our Mr. H. A. Petersen gives his personal attention to all inquiries. His experience in the Seed and Plant trade enables you to obtain the best horticultural advice free of charge. Consult him.

When in doubt about the selection of seeds or plants you wish to plant, let us do the selecting. We'll serve you right.

Cabbage.
(Succimon).

CABBAGE.

(1 oz. will sow 6 sq. yards for transplanting).

Cabbage may be sown practically all the year round. End of January to end of April for Winter sorts, and from May to January for Summer kinds. Monthly sowings for successional crops is recommended.

- Early Jersey Wakefield.**—A very early cabbage, ox-heart shape, of excellent flavour. One of the most serviceable varieties for home use. 1/6 oz. 6d. pkt.
- Burpee's Allhead.**—A semi-early variety, producing compact head, with few outside leaves. 2/- oz.; 6d. pkt.
- Early York.**—Well known variety, medium size. Per oz., 1/6; 6d. pkt.
- Enfield Market.**—One of the best. Per oz., 1/6; 6d. pkt.

Copenhagen Market.—Very fine sort, large round heads of great durability; splendid flavour and not coarse. Per oz., 1/6; 6d. pkt.

Drumhead.—Large flat Cabbage, grows to an immense size. Per oz., 1/6; 6d. pkt.

Succession.—A splendid keeping variety, large, firm heads of very superior quality and excellent flavour; most serviceable. Per oz., 3/6; 6d. pkt.

Surehead.—Very uniform in size and shape, round flat headed, very firm and of splendid texture. Per oz., 1/6; 6d. pkt.

St. John's Day.—An early Drumhead, large, valuable summer variety; splendid market variety. Per oz., 1/6; 6d. pkt.

Red Dutch Niggerhead.—A wonderful variety, red to the heart, easily one of the best reds. Per oz., 2/-; 6d. pkt.

Chinese Cabbage.

Pe-stai.—A splendid vegetable, grows like a Cos. Lettuce; is very palatable and useful. 6d. pkt.

CARROT.

(1 oz. will sow about 100 ft.).

Carrots succeed best in sandy soil or for that matter pure sand, but any good soil, free from stones, will suit them, but if possible, land which has been previously cropped, as they should not be put in freshly manured land. Deep digging is essential, and the seedlings should be thinned out three or four inches apart.

- Early Short Horn.**—Very early, good colour. Per oz., 1/-; 6d. pkt.
- James's Scarlet Intermediate.**—A fine sort, short top. Per oz., 1/-; 6d. pkt.
- St. Valery.**—Half-long; the best main crop variety grown. Per oz., 1/-; 6d. pkt.
- Early Nantes.**—A variety of much merit, smooth and shapely, and of bright scarlet colour, very fine flavour and little core. Per oz., 1/-; 6d. pkt.

GROW MORE VEGETABLES—

But to ensure success,
procure your supplies
of Seeds from

PETERSEN'S
"ACACIA
FLORISTS."

Cabbage.
(Sugarloaf).

CAPE GOOSEBERRY.

(*Physalis Edulis*).

Sow seed in pots, September to November, and when seedlings are large enough, transplant to a warm border about three feet apart. 6d. pkt.

CAULIFLOWER.

(1 oz. will sow 6 sq. yards for transplanting).

Cauliflowers do best in richly manured soil, and they take abundance of water, and the plants should be from 24 to 30 inches apart. Sow December to February for Autumn crop, and small sowings should be made monthly for succession, until about August.

Early Phenomenal.—The most early variety and particularly suitable for Queensland climate. Short stemmed, purest white compact heads. 5/- oz.; 1/- pkt.

Early Rimus.—The best early variety. Oz., 3/-; 1/- pkt.

Early London.—A well-known early maturing sort, good sized, close heads. Oz., 2/-; 6d. pkt.

Late Eclipse.—One of the best main crop varieties; immense heads of remarkable purity. Oz., 2/-; 6d. pkt.

Late Metropole.—Huge snow-white heads, very tender and of delicate flavour. 1/- pkt.

Snowball.—A very early kind, matures in four months, very white, and of exquisite flavour. 1/- pkt.

Veitch's Autumn Giant.—A well-known sort. Oz., 2/-; 6d. pkt.

CAPSICUM, OR PEPPER.

Should be sown in warm border and transplanted when sufficiently robust. Rich soil suits them best. Sow September and October.

Long Red Cayenne.—Rich in colour, conical. 6d. pkt.

Large Bell, Sweet Spanish, or Bull Nose.—Early, mild, and of fine flavour. 6d. pkt.

CELERY.

Sow in boxes, and when plants are strong enough transplant into trenches that have been deeply dug and well manured. The plants should be carefully earthed up as required.

Giant White.—Solid, very superior, large heads, requires little earthing up. 6d. pkt.

White Plume.—Improved, one of the best. 6d. pkt.

Soup Celery.—Used for flavouring stews, soups, etc., and is not suitable for the purpose of sowing. 6d. per oz.; 4/6 lb.

RED CELERY (For Rheumatism).

Red Celery is now a recognised cure of Rheumatism, and is highly recommended by the medical faculty. A teaspoonful infused in a cup of boiling water and allowed to stand for half an hour, may be taken freely. The same seed may be used a second time. 6d. pkt., 1/6 oz., 5/- 1/4 lb., 5/6 posted.

CELERIAC

(Turnip-Rooted Celery).

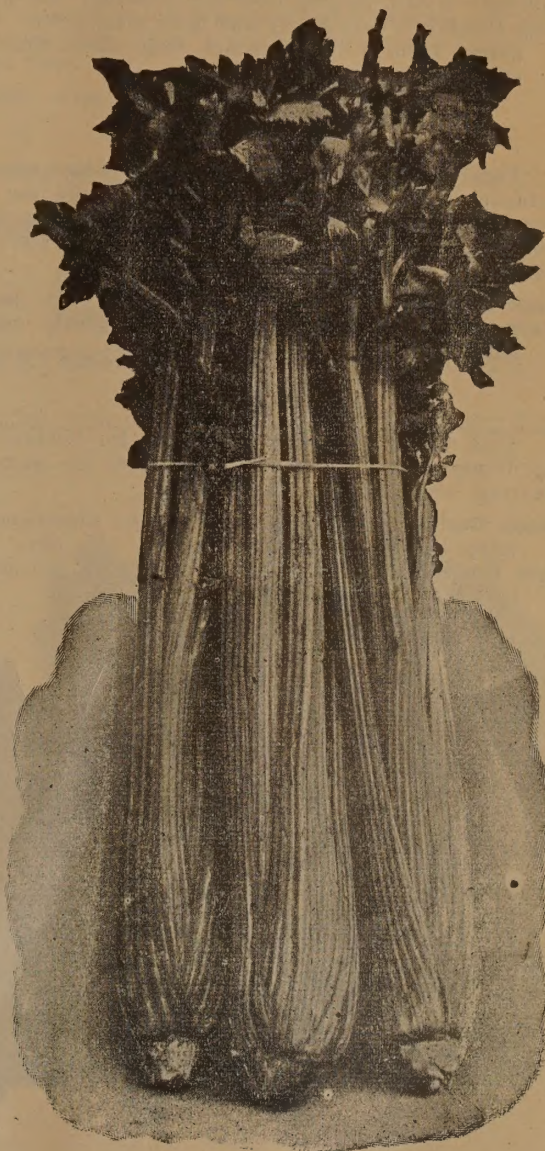

A delicious vegetable, largely used in Europe. Excellent for stewing or cooking in any other way. May also be cooked up like beet and used in salad. 6d. pkt.

CORN, SWEET or TABLE.

Sow in rows about 3 feet apart and plants about a foot apart. The plants require rich soil and should be top dressed during growth. The cobs are best when taken as soon as the silk dies.

Country Gentleman.—Popular variety, very productive and luscious. 6d. pkt.

Golden Bantam.—Rich, creamy yellow, the earliest as well as one of the best. Successive sowings may be made of this variety, say, every 10 or 14 days. Dwarf growth, but exceedingly productive. 6d. pkt.

CELERY (White Giant).

CRESS.

Sow thickly in shallow drills every alternate week. Should be sown six days earlier than Mustard to gather at the same time.

(1 oz. will sow 70 feet).

Extra Fine Curled.—Per oz., 1/-; 6d. pkt.

Water.—Readily grown in moist situation. 6d. pkt.

CUCUMBER.

Cucumbers require a rich, somewhat sandy soil, and abundance of moisture. Seeds for early crop should be raised on a hot bed and well hardened off and planted out, say September or October, as soon as the weather becomes warm. The plants should be put in 2 feet each way.

Apple Shaped.—Fruits about the size of small apples, almost round, very tender and delicious. 6d. pkt.

Early White Spine.—Crisp, well flavoured variety, very prolific. 6d. pkt.

Gherkin.—Small, largely used for pickling. 6d. pkt.

Long Prickly.—Very hardy and most productive. Deep green, from 9 to 12 inches long; fruit firm and crisp. Very popular. 6d. pkt.

EGG PLANT.

Plant out about two feet apart in rows, and same distance between the plants. Require shading and abundant watering till established. The young plants should be stopped to encourage branching, and they should not be overcropped. 6d. pkt.

Giant Purple.—A variety of much merit. 6d. pkt.

Black Beauty.—Large fruit of deep glossy purple, early. 6d. pkt.

ENDIVE.

This makes a suitable substitute for Lettuce during Winter. Sow January to March to be ready for planting when Autumn rains come.

Green Curled.—Lovely curled variety; abundance of crisp leaves of splendid flavour. 6d. pkt.

Moss Curled.—A very delicious sort, most acceptable in salads. 6d. pkt.

HERBS.

Sow in boxes or a cold frame, or in a shaded seed bed, and when large enough, plant out in well-prepared border. Cut off tops before flowering, and they may be dried for Winter use. A patch of kitchen herbs is a valuable addition to every kitchen garden. 6d. pkt.

Parsley. Celery. Lavender. Marjoram. Sage.
Sweet Thyme.

KOHL RABI (Turnip-Rooted Cabbage).

(1 oz. will sow 150 ft.).

Any good garden soil will suit this nutritious vegetable. Sow in rows and thin out similar to Turnip. When the roots are 3 to 4 inches in diameter they are ready for use.

Early Large Green.—A popular variety. Per oz., 1/6; 6d. pkt.

Early Large White.—Smooth and well shaped bulbs. Per oz., 1/6; 6d. pkt.

Large Purple.—A good variety. Per oz., 1/6; 6d. pkt.

LEEK.

Sow in prepared seed beds, and when seedlings are about 6 inches high, plant in rows or shallow trenches about 6 to 8 inches between the plants and 15 to 18 inches between the rows. When well advanced, earth up to blanch the stems.

(1 oz. will sow 50 ft.).

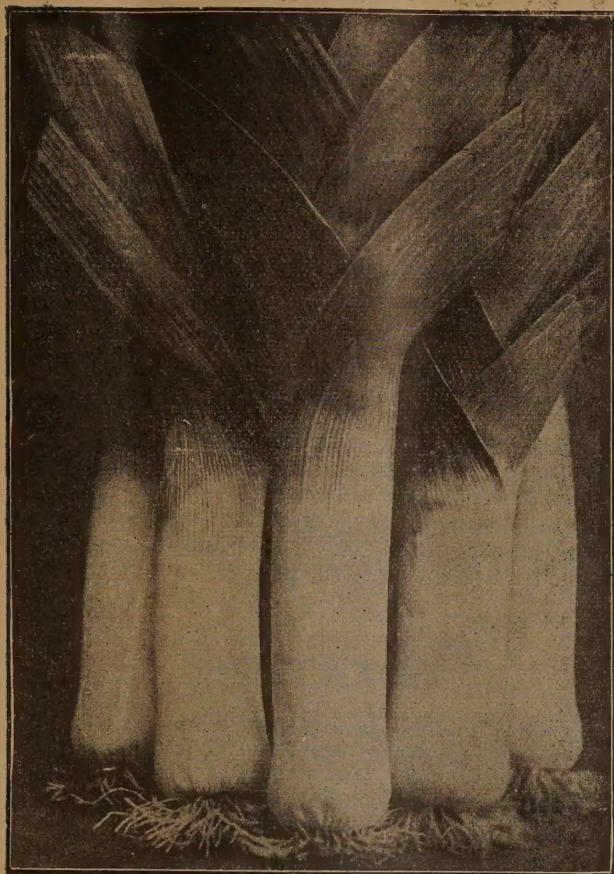

London Flag.—A good variety for ordinary crop. Per oz., 1/6; 6d. pkt.

Lyon.—The finest of Leeks; long thick pure white; immense size and agreeable flavour. Per oz., 2/-; 6d. pkt.

Musselburgh Giant.—Large, and of extra good quality. Per oz., 2/-; 6d. pkt.

Kohl Rabi.

LEEK
(London Flag).

LETTUCE.

Cabbage Varieties.

(1 oz. will sow 120 ft.).

Lettuce may be sown any month of the year, and is admirably adapted for successive planting. Small sowings should be made, but frequently, in order to have a constant succession. Sow in drills and thin out to about 9 to 12 inches apart and 15 inches between the drills.

All Year Round.—Firm, crisp heads. Per oz., 1/6 6d. pkt.

Brittle Ice.—Large, crisp, solid, dark green, long standing. Per oz., 2/-; 6d. pkt.

Drumhead.—Large, crisp and tender, does well in warm districts. Per oz., 1/6; 6d. pkt.

Iceberg, Improved.—Very solid and crisp. Per oz., 1/6; 6d. pkt.

Mignonette.—Crisp, firm, and of good flavour. 6d. pkt.

Hanson.—Beautifully curled, crisp, and tender. Per oz., 1/6; 6d. pkt.

Webb's Wonderful.—One of the largest as well as one of the most delicious Lettuces, crisp and of excellent flavour, does not readily run to seed. Per oz., 1/6; 6d. pkt.

Cos Varieties.

Paris White.—A most useful variety, close growing, of fine quality. 6d. pkt.

Green Gem.—A variety of superior, self-folding and of excellent flavour. 6d. pkt.

Tom Thumb.—Very early, small, compact, firm heart, smooth edge. 1/6 oz.; 6d. pkt.

MUSHROOM SPAWN.

Special English Milltrack.

This is the best obtainable, the spawn being strong and very productive and reliable. Three bricks broken up into pieces about the size of a walnut are sufficient to spawn a bed 3 ft. x 6 ft.

In Bricks, 2/- each, postage extra.

MUSTARD.

(1 oz. will sow 1 sq. yard).

Most useful as a salad with Cress or Lettuce, and may be sown at intervals all the year round. Cut when 2 inches high. Sow a week after Cress to gather at same time.

White.—Finest. Per oz., 1/-; 6d. pkt.

GROW MORE VEGETABLES—

But to ensure success, procure
your supplies of seeds from

PETERSEN'S "ACACIA FLORISTS."

LETTUCE (Hanson).

ONION.

(1 oz. will sow 50 ft.).

To cultivate Onions successfully, the ground should be in good heart, dug deeply, and well manured. Wood ash added to the soil is of much value. Sow seed in drills a foot apart and thin to six inches. June is a good month to sow for transplanting and for bulbing where sown, the seed should be sown in July or August. Pickling Onions are best sown fairly thickly during August.

Ailsa Craig.—The largest and most handsome skinned, splendid keeper. Per oz., 1/6; 6d. pkt.

Brown Spanish (Re-selected).—Bright brown skinned variety, of fine shape, splendid keeper. Per oz., 1/6; 6d. pkt.

Brown Globe.—Rounder in shape than the above, and of excellent quality. Per oz., 1/6; 6d. pkt.

Golden Globe.—One of the earliest, golden skin, good shape, fine flavour. Per oz., 1/6; 6d. pkt.

Odorless.—This variety lacks the odor peculiar to Onions, and is most serviceable for salads, etc. Mild, sweet, and juicy. A heavy cropper of uniform size. Per oz., 3/-; 1/- pkt.

Silver Skinned.—A small pure white variety, excellent for pickling. Per oz., 1/6; 6d. pkt.

The Queen.—About 1½ to 2 in. diameter, splendid for pickling, very early, mild. Per oz., 1/6; 6d. pkt.

PARSNIP.

(1 oz. will sow 50 ft.).

Treat similar to Carrots. Sow in drills 18 inches apart and thin to 6 inches apart. For early use a sowing made in Autumn is recommended, but only a small one, as the produce will not keep long.

Hollow Crowned, Improved.—Good size, fine flavour and quality. Per oz., 1/-; 6d. pkt.

Student.—Smooth, very large white roots, of good flavour. Per oz., 1/-; 6d. pkt.

PARSLEY.

(1 oz. will sow 80 ft.).

Sow in shallow drills and thin to 8 inches apart. The seedlings may be transplanted, but it is not desirable. If kept cut back, the curls improve, and the plants do not run to seed so readily. Sow in August for Summer-Autumn supply, and again in March and April for Winter.

Moss Curled.—A very fine strain of exceedingly well curled dwarf compact habit, and a rich emerald green. Per oz., 2/-; 6d. pkt.

PEAS.

(1 lb. will sow 60 ft.).

Peas will grow in any good garden soil, which should be well worked and get a dressing of manure. Sow in drills 2 to 4 feet apart according to height, the dwarf varieties not receiving so much space as the tall. A sowing may be made in April and continued at intervals till January. For a continuous succession it is a good rule to sow again whenever the previous sowing is two or three inches above ground.

Early Croppers.

English Wonder.—A dwarf Pea of fine quality, 15 in. Per lb., 1/6; 6d. pkt.

Richard Seddon.—Deep green pods, freely produced and well filled with delicious Peas, 15 to 20 in. Per lb., 1/6; 6d. pkt.

Greenfeast.—A splendid second early, deep green pods, packed with luscious peas of fine flavour. A great favourite with market gardeners, 2 to 2½ ft. Per lb., 1/6; 6d. pkt.

Stratagem.—An excellent variety of proved merit; a heavy cropper, 2½ to 3 ft. Per lb., 1/6; 6d. pkt.

Maincrop Varieties.

Senator.—Very heavy cropper, stands dry seasons well, large pods of fine quality, 3 ft. Per lb., 1/6; 6d. pkt.

Yorkshire Hero.—Known as a Pea of good quality, although the pods are not very large, 3 ft. Per lb., 1/6; 6d. pkt.

Daisy.—A variety of much excellence; large deep green pods, well filled with delicious peas, 2½ to 3 ft. Per lb., 1/6; 6d. pkt.

POTATOES.

Plant the tubers in any good friable soil in drills 2½ feet apart; 4 inches deep, and about 12 inches between the tubers. Medium-sized tubers are best. Earth up when 6 inches high, and continue this operation as the plants advance. In dry warm situations a first planting may be made in July.

We are in a position to supply all the leading varieties of Seed Potatoes, but owing to the continual fluctuation of the market we are unable to quote prices, but will supply at current rates.

The undernoted are good reliable kinds:—

Carmen No. 2 (Late); **Brownell's**; **Carmen No. 1** (Early); **Early Rose**; **Satisfaction**; **Sharpe's Express**; **Up-to-Date**; **Scottish Triumph**; **Early Manistee**.

Parsley (Non-Curled).

PUMPKIN.

Sow in hills 3 feet apart each way in sweet, strong, rich soil, and thin out to two plants to each hill.

Beaudesert, or Queensland, Blue.—A pumpkin of exceptionally fine quality and flavour; dark skin, golden flesh, medium size. Each year our Trials enhance our good opinion of this variety. The flesh is dry and cooks beautifully. Without a doubt Queensland Blue is one of the most satisfactory varieties offered to-day. 6d. pkt.

Select Crown.—An excellent strain carefully re-selected from the old Crown and superior to it in quality and productiveness. This re-selected variety is of good dark colour, even shape and has a small seed cavity. Supplies rather limited. 6d. pkt.

Mammoth Cattle.—A mixture of the large cattle varieties, many weighing up to 60 and 70 lbs. grown well. They are round to long in shape and mostly grey and greyish-pink in colour. Thick and fleshy. Will give a very heavy weight of crop, of great value for feeding purposes. 6d. oz; 5/- lb.

Mixed Cattle.—For stock feeding. Keeps well. 6d. oz.; 3/6 lb.

Triamble.—A very popular sort, best adapted for table use. It is of peculiar shape, and has few seeds, but is of excellent quality, and keeps well. 6d. pkt.

Turk's Cap.—Probably the best known variety, outer skin deep orange-yellow, and the fruits are turban shaped, fine grained and of good flavour. 6d. pkt.

RADISH.

(1 oz. will sow 60 ft.).

Seed may be sown in drills or broadcast every fortnight throughout the year in well prepared soil. The secret of growing Radishes successfully is to keep them well supplied with moisture.

French Breakfast.—Olive-shaped, mild and tender. Per oz., 1/-; 6d. pkt.

Icicle.—Long white, crisp and solid. Per oz., 1/-; 6d. pkt.

Long Scarlet.—About 6 inches, a well-known sort. Per oz., 1/-; 6d. pkt.

Turnip Red.—Quick growing variety. Per oz., 1/-; 6d. pkt.

Turnip White.—Quick grower. Per oz., 1/-; 6d. pkt.

Turnip, Mixed.—The above two varieties in mixture. Per oz., 1/-; 6d. pkt.

RHUBARB.

Rhubarb requires a deep rich soil. Seeds should be sown in drills, August and September, 18 or 20 inches apart, and thinned out to 18 inches between the plants when they are 2 or 3 inches high. When planting the roots, 2 to 3 feet apart each way should be allowed.

Early Albert.—A good early sort. 6d. pkt.

Myatt's Victoria.—Very prolific, one of the best. 6d. pkt.

Topp's Crimson Winter.—A very fine variety, produces good crops in Winter and Spring. 6d. pkt.

ROSELLA.

Pkt., 6d.

Only suitable for semi-tropical or tropical climates. The celebrated Rosella Jam is made from the fleshy calyx of the flowers. Sow in early spring in a warm situation.

SALISFY (The Vegetable Oyster).

(1 oz. will sow 80 ft.).

Cultivation similar to Parsnip.

Mammoth Sandwich Island.—A large growing variety of this increasingly popular vegetable. Notwithstanding their size, they are of excellent quality and delicately flavoured—an oyster-like flavour. Per oz., 2/6; 6d. pkt.

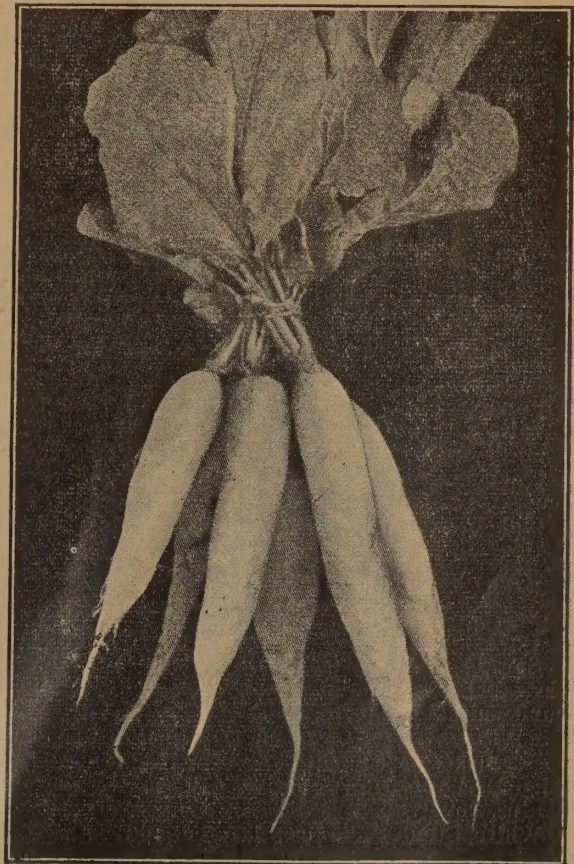

SAVOY (Winter Cabbage).

(1 oz. will sow 6 sq. yards for transplanting).

Culture is similar in all respects to Cabbage.

Dwarf Green Curled.—Early and compact. Per oz., 1/6; 6d. pkt.

Drumhead.—Very hardy sort, of large size, and fine quality. Per oz., 1/6; 6d. pkt.

RADISH
(White Delicious).

SQUASH.

Closely allied to Pumpkins and Marrows, the Squash requires similar treatment.

Early White Scalloped, or Custard.—(See Vegetable Marrows).

Golden Hubbard.—Bright golden yellow skin, flesh bright orange and of exquisite flavour, fine grained and firm. Early and very prolific, and keeps well. 6d. pkt.

Green Hubbard.—One of the most popular kinds, deep green skin, with thick dry sweet flesh. Fruits weigh 8 to 10 lbs., and keep well. 6d. pkt.

SPINACH.

Prickly, or Winter.—Useful variety. Per oz., 1/-; 6d. pkt.

Victoria, Improved Round.—Much improved variety, thick flesh leaves. Per oz., 1/6; 6d. pkt.

New Zealand (The Dry Weather Spinach).—Valuable for growing in dry situations. May be transplanted. Per oz., 1/-; 6d. pkt.

SWEDE TURNIP.

2/6 lb.; 1/- ¼-lb.; 6d. pkt.

Garden Swede.—The best swede for garden cultivation. Sow in summer and autumn.

Champion Purple Top.—A standard globe-shaped variety, which gives wonderful returns and is the standard sort for growing for market. Our strains are unexcelled, the crop comes in evenly, and the Swedes are well shaped, large, and keep well.

Monarch.—A large tankard-shaped variety, with purple top. Heavy yielder, and a good keeper. Excellent for stock or market growing.

SWEET POTATO.

Cultivation.—The best way to procure these is by ordering rooted plants, which go readily by post, and which are usually obtainable at a few day's notice any time during the late spring and early summer. These should be planted out in ridges two-and-a-half feet apart, in land which has previously been deeply trenched and well fertilised with a good phosphate manure. They are generally ready for digging in about four months from planting.

About November we can usually supply the white, pink or red skinned varieties. Prices on application.

TURNIP.

(1 oz. will sow 120 ft.).

Sow in drills 15 inches apart, and thin out to 8 inches between the plants. Rich, well pulverised ground suits them best.

Early White Stone.—A good shape, and fine quality. Per oz., 1/-; 6d. pkt.

Golden Ball (or Orange Jelly).—One of the best Turnips, lovely colour, perfect shape, matures after White Stone. Per oz., 1/-; 6d. pkt.

Snow Ball.—Splendid for sowing in Autumn or Spring. Matures quickly. 6d. pkt.

Purple Top Early Milan.—Flat shape, medium size, excellent flavour. Per oz., 1/-; 6d. pkt.

TOMATOES.

Earliana.—An extra early sort and one of the Tomatoes most favoured by market growers. Vines carry very heavy crops of large smooth bright scarlet fruit, but the habit of the vine is not so protecting as Earliwinner. Fruit itself is solid and meaty. Its earliness makes this variety of great value. 2/6 oz.; 6d. pkt.

June Pink.—An early maturing selection from Earliana, and differing chiefly from that variety in the colour, which is a purplish pink. The fruit is uniform in size and shape, and the flesh solid. Being a rather tender skinned variety it is not used extensively by market growers. 3/- oz.; 6d. pkt.

Matchless.—A late variety giving the greatest satisfaction to market growers. The fruit is large, smooth and uniform, bright colour, and of excellent flavour. The yield is very heavy and they carry well. The fruit will colour up splendidly after picking. 2/6 oz.; 6d. pkt.

Targinnie Blue.—This variety is largely grown in one or two districts in Queensland, mainly for its most excellent keeping and carrying qualities. It is a main crop, bluish crimson in colour and largely grown where fruit has to be shipped long distances.

Ponderosa.—This variety has been greatly improved. While not quite smooth and even in shape much of the old "ribbiness" has been eliminated. It grows to enormous size, probably the largest fruited sort grown. The fruit is luscious, very solid, and of specially good flavour. 3/- oz.; 6d. pkt.

Earliwinner.—Selected from Earliana and having all the good qualities of that variety but in an improved form. It is slightly earlier than Earliana, the fruit is deeper in shape, more uniform in size and is better shaded from the sun by the improved habit of the plant. It is a heavier cropper than Earliana and should be a better carrier. 3/- oz.; 6d. pkt.

Bonny Best.—In our trials this is about the same season as Chalk's Early Jewel, but in our opinion has points of superiority. The fruit is of medium size, very smooth, solid and uniform, and produced more or less in clusters in the centre of the plant. Growth is vigorous and leafy, thus protecting the fruit well. The crop of bright red fruit ripens evenly, and this variety is a decided acquisition. 2/6 oz.; 6d. pkt.

Chalk's Early Jewel.—A first early sort of fine quality. The fruit is of good market size, smooth shaped, solid and bright red colour and of remarkably sweet flavour, bears well throughout the season, and has for long been a favourite early variety. 2/6 oz.; 6d. pkt.

Burwood Prize.—Probably the most favoured main crop variety ever grown in this country. It is one of the hardest and most vigorous varieties we know of, and will give enormous crops of smooth, oval fruit, of fine colour and texture, which are very solid and splendid carriers. Juicy, good flavoured, and fine size and shape. 3/- oz.; 6d. pkt.

Stone.—This is the smooth large red strain and is very solid and a good carrier. We can recommend this very highly. It is considered by market growers to be one of the very best late varieties for market, and is largely grown to come in after Burwood Prize. The fruit is of the finest quality. 2/6 oz.; 6d. pkt.

Walker's Recruit.—Round smooth rather small fruit, firm flesh and delicious flavour. 6d. pkt.

Buckeye State.—A late cropping pink fruited variety. Fruit large, plant of vigorous growth. 6d. pkt.

YELLOW FRUITED VARIETIES.

Golden Queen.—Fruit is of medium size, smooth in shape and a very good cropper. Those who realise the possibilities of the golden fruited varieties for their mild flavour as well as for their value as a contrast with the red sorts in salads, cannot do better than plant Golden Queen. 6d. pkt.

DISEASE RESISTANT VARIETIES.

Marglobe.—A very productive variety and perhaps the best in this section, in our trials a very excellent sort. Second early in season. Plants medium, large and erect, shading the fruit well. Fruit large, red, smooth, and globular. 3/- oz.; 1/- pkt.

Norton.—A late round large solid variety which has been evolved from the well known variety Stone. It seems to have all the good qualities of that variety and, therefore, can be confidently recommended. 3/- oz.; 1/- pkt.

Tree Tomato (Cyphomandra).—Sub-tropical shrub; fruit is edible and resembles the Tomato, but is not in any way related to it. 6d. pkt.

Red Rock.

Bloomsdale.

Mixed Table.—A mixture of all the best table varieties. Price, 6d. pkt.; 5/- lb.

VEGETABLE MARROW.

(Cultivation similar to Pumpkin).

Early White Custard.—Very prolific, with small fruits of fine quality. 6d. pkt.

Long White.—Trailing; the best. 6d. pkt.

Long White.—Bush, of equal quality to above, but does not require as much room. 6d. pkt.

Long Green Trailing.—Green, striped skin; a good bearer. 6d. pkt.

WATER MELONS.

Pkt., 6d.

Cultivation.—The same as for Rock Melon and Cucumber.

McIvor Sugar.—An oblong Melon, very sweet flavoured, pink flesh.

Cole's Early.—A splendid early variety for districts with short season. It is very hardy, a sure cropper and has a bright red sweet flesh, with very thin green rind, striped with lighter shades. Rather brittle for market.

Kleckley Sweets.—Dark green skin, crimson flesh, medium to large size, oval shape. Has very sweet distinctive flavour; a favourite for the home gardener.

Golden Honey.—The best of the yellow fleshed Melons and a most excellent eating variety. The flesh is a sparkling golden colour and delicious flavour. Oblong shape. Dark green striped darker.

Tom Watson.—A fine large dark green Melon with bright pink sweet flesh. Excellent carrying variety and one of the best for market.

Halbert Honey.—A fine medium early Melon for the home garden. Long and cylindrical in shape, deep green rind with fine veins.

Sweetheart.—A very large, oval round, bright skinned Melon of fine quality; a good keeper, excellent shipper and a good seller.

Mixed Varieties.—To suit customers who grow for domestic use only, we offer a mixed packet of the best dozen varieties.

Marrow—Long White Bush.

PETERSEN'S ACACIA FLORISTS, O.K. Building,

Fordhook Early.—Beautiful carmine flesh, skin red, an extra early sort which produces fruits weighing 25 lb. each, thin rind. 6d. pkt.

Ice Cream.—An early maturing variety, medium size, very prolific, scarlet flesh of exquisite flavour, fruits weigh about 20 lb. each. 6d. pkt.

Preserving.

Citron (Green Seeded).—Round shape, green skin, striped white, excellent for preserves. 6d. pkt.

Citron (Red Seeded).—Similar to above, very productive and makes splendid jam or preserves. 6d. pkt.

MELON.

Melons should be sown in slightly raised hills, 4 to 6 feet apart each way. Sow seeds thickly and thin out to four of the strongest to the hill. To get early supplies, sow seeds in beds in August, and transplant in mild weather. Outdoor sowings should not be made before mid-September.

ROCK MELON.

Honey Dew.—A remarkable late maturing and long keeping Melon. It is quite distinctive and promises to be of very great value as a late marketing sort, and should be planted in districts with a long growing season.

Honey Dew is round, has a smooth cream skin, and carries well. The flesh is emerald green, very thick, crisp and juicy, and has a fascinating flavour. The average size is 10 inches by 9½ inches. This variety used to be classed with the Casaba, being a late sort and unlike the ordinary Rock Melon. It is now thought that this Melon is of African origin.

Honey Dew has a good reputation on the market, and its popularity is increasing. This variety and Rocky Ford make an excellent combination for the market grower.

Cobra or Indian Cream.—For convenience we catalogue this along with our Rock Melons to which it is similar in habit of growth. The fruit is quite distinct, being oblong in shape and creamy yellow when ripe. It is not sweet, so requires sugar when eaten as a dessert. It makes an excellent foundation for fruit salad and is used for pies in place of apples. Good cropper. Pkt., 6d.

Bay View.—A very popular melon for general marketing purposes, oblong in shape, nicely ribbed and retted. 1/- oz.; 6d. pkt.

Rockyford.—One of the best varieties introduced, medium size, but it is extremely prolific; very early; green flesh. 1/- oz.; 6d. pkt.

Musk or Rock.

Emerald Gem.—Acknowledged to be the most deliciously flavoured of all. Matures very early and is enormously productive; rich dark green skin, smooth, and having extra thick flesh of attractive salmon colour. 6d. pkt.

Early Hackensack.—Superb quality, thickly netted green skin, sweet, spicy, and delicious. 6d. pkt.

Honeydew (Winter).—Smooth fruits, pale green colour, delicious flavour, very productive. 6d. pkt.

Large Yellow Cantaloupe.—A large Melon deeply ribbed and clearly netted, salmon-pink flesh, of delicious flavour, matures early. 6d. pkt.

VERY IMPORTANT NOTICE.

PLEASE ADDRESS ALL CORRESPONDENCE TO

Petersen's Acacia Florists

(Harry A. Petersen, Manager),

or Box M 996 G.P.O., Brisbane.

WE HAVE NO CONNECTION WITH ANY OTHER FIRM OF PETERSENS.

ROSES

SPECIAL REDUCTION

In Price of Well Grown Rose Trees.

We have for this Season's supply Twenty Thousand (20,000) Superior Rose Trees, grown under special supervision, every plant nicely rooted, well grown, and guaranteed true to name.

Always deal with a Reputable Firm.

Our Mr. H. A. Petersen has had thirty years' practical experience in all branches of nursery, and seed departments, and his advice is free for the asking.

Beware of Cheap Jack quality that is dear at any price, and sold by cash and carry stores in city and country.

Town Price: 1/- each.

Country Clients: 1/- each.

6 for 7/6 or 12 for 13/6—Carriage Paid.

Prune the Shoots of all Roses to within one or two eyes of their base before planting. The top bud should be pointing outwards.

Soil.—If the soil is of poor, sandy nature, it can be improved by adding heavier soil, but clay is useless for this purpose, as it contains nothing useful. It is because the finest Roses are grown on rather heavy loam, which mostly has clay subsoil, that many people run away with the idea that clay is necessary for Roses, whereas it is only good where Nature has placed it as a means for retaining moisture.

Staking Standard Roses is necessary until they become well established.

A water-logged soil is fatal to success, and some means should be found to get the water away.

Pruning.—There is nothing very difficult about pruning Roses, but the operator must have some definite object in view. Roses are pruned either for garden decoration or to produce large or exhibition blooms.

Some varieties vary in colour, especially after planting, and with the conditions.

Varieties.—If this is left to us, our clients those sorts he considers out of the better sorts. At their own varieties we would ask for extra names, as they may select to grow only in limited quantities and of.

ES.

Pruning.—Pruning can be less severe if blooms are wanted only. First cut out weak-looking wood, then any are growing across others, especially re. Cutting away the centre wood in light. Select the best shoots, and a 3 or 4 buds from the base, always pointing outwards or away from the

1, treat in exactly the same way, except prune back to one or two buds.

The time of pruning, to a certain extent, determines the time of flowering—about the middle of June is a very good time.

Summer Pruning.—Most people Summer prune their Roses without knowing it, simply by cutting the flowers; but the plants should be carefully gone over with the secateurs about the middle of January to mid-February, pruning as in Winter, but not quite so severe.

Pruning Ramblers is quite different to Climbing Roses. These should be pruned just after flowering in the late Summer by cutting away the previous year's growth, thus making room for the young growths which come up from the base.

Rose Failures.—All Roses sent out by us are strong, healthy plants, which have flowered at least once and we cannot undertake to replace failures as the plants are beyond our control when planted. Naturally some varieties make stronger growth and establish quicker than others.

INSECTS, PESTS, ETC.

Green and Black Fly (Aphis).—Attack the young growths, more particularly in the Spring and early Autumn.

Red Spider.—Which turns the foliage a greyish colour, appears during hot dry weather.

Thrip is bad during hot dry summers and gets into the flower buds.

Mildew attacks certain varieties, more especially after a spell of damp weather. A whitish powder appears and the foliage attacked begins to curl.

White Scale.—Sometimes appears on the stems of neglected plants.

REMEDIES.

All of the foregoing, including Mildew, can be kept in check by spraying with **DESTRUXOL**, a new spray recently introduced from California, which is an **Insecticide and Fungicide** combined. This should be used double strength for Red Spider, Scale and Mildew (2-teaspoons to 1 gallon of water) whilst 1 teaspoon to 1 gallon of water will kill Green Fly, Black Fly and Thrip.

Thrips are minute thin grey insects which attack the flower buds in the Spring and Summer, they get between the petals and are difficult to reach with spray, but Dextruxol will kill any it touches, and it is the only thing we have tried that will. Spray at the first sign of Thrip and every second day whilst any remain.

Black Spot is a fungus in the shape of black spots on the foliage, causing the leaves to turn yellow and drop off.

Dieback attacks some varieties worse than others, some being apparently immune. Commencing from

the top shoots die back; when seen, the shoots affected should be cut off well below the dead portion.

Remedies.—The above two fungoid diseases can be very much curtailed by spraying with **Dextruxol Emulsion** after pruning in the winter, and again in the early Spring, this emulsion differs from Dextruxol in that it can be used during cold weather. At this time of the year it will also kill the eggs of Summer attacking insects and scale.

Manuring.—Farmyard manure should be deeply dug into the ground sometime before planting; this will be all that is necessary for the first year.

After the first year, a dressing of a mixture of superphosphate, sulphate of ammonia, bone meal and potash can be applied in early Spring and late Summer. Stable manure or rotted vegetation should be dug in during the winter. We use and recommend a well-balanced rose fertiliser with these ingredients called Kwickgrow.

CREAM and YELLOW ROSES.

Alexander Hill Gray.—Its growth is robustly vigorous, erect, and very floriferous, every shoot being crowned with a flow bud, which develops into a bloom of very large size, with high pointed centre. Its deep lemon yellow colour intensifies as the blooms develop. Strongly scented. An exhibition bloom of the first rank.

Geo. Schwartz.—A bright deep canary yellow, very deep and rich in colour. Blooms are large and full; a very handsome rose.

Hugo Roller.—Colour is rich lemon-yellow, the petals being edged and suffused with crimson; flowers of medium size, of good shape, and very freely produced; highly recommended.

Kaiserin Augusta Victoria.—One of the most beautiful of all roses. A vigorous grower and very free flowering; producing flowers on long stems. Colour is white with tinge of yellow in centre. Should be found in every collection.

Kootenay.—The blooms, which are produced in great profusion, are a beautiful primrose colour. More vigorous in growth than K.A. Victoria and equally free flowering.

Lady Plymouth.—A most distinct and meritorious rose. Its pearly, delicate, but deep ivory cream petals are very faintly flushed, giving it a most piquant finish. Blooms are large, full and of spiral form.

Lady Hillingdon.—Colour a deep apricot yellow, shaded fawn; buds long and pointed; very free flowering. One of the best yellow roses for garden and decorative purposes.

Lillian Moore.—Colour deep pure Indian yellow, with slightly deeper centre. The flowers are large and very full, of perfect Camellia shape. Growth vigorous, branching, and very floriferous. A magnificent rose for every purpose.

Margaret D. Hamill.—Produces large globular blooms in great profusion on vigorous erect shoots; colour delicate solid straw flushed on the back of petals a delicate carmine. A brilliant rose for all purposes.

Madame C. Soupert.—Buds are deep yellow, shaded peach carmine, flowers large, very full, of the most perfect form, brilliant yellow suffused pink. A grand rose in every particular.

Miss Alice de Rothschild.—Flowers very large, full, and of perfect form, with high pointed centres. Colour rich deep citron yellow, which intensifies as the flower expands. Fragrant, free and continuous in bloom.

Mrs. Dudley Cross.—Pale chamois yellow, beautifully illuminated in Autumn with rainbow tints of rose and crimson. Young foliage beautifully tinted with red.

Miss H. R. Darlington.—Creamy yellow, flowers large, opening perfectly with large petals; superb show variety.

Fontanele.—Lemon yellow, with a deeper centre; long, well shaped buds, and long, stiff stems. 2/.

Golden Dawn.—Rich sunflower yellow, flushed deep old rose. Vigorous branching habit. An Australian raised variety of promise. Price,

Golden Ophelia.—Golden yellow; a medium-sized bud of perfect shape on long upright stems.

Perle von Godesberg.—A golden yellow sport from Kaiserin A. Victoria; a very beautiful rose; a vigorous grower and very free bloomer, producing flowers on long stems. Large blooms.

Rev. F. Page-Roberts.—Blooms large, full and well formed, of a beautiful rich Marechal Neil colour, with buq markings on the reverse of petals. In our opinion one of the finest roses yet introduced. No garden would be complete without a plant.

Souvenir de Pierre Notting.—Fine apricot yellow, washed with golden yellow and shaded with orange. Blooms large and full, opening well. A Gold Medal Rose.

Sunburst.—Orange yellow, with deeper centre, sometimes varying to cream; fine pointed buds, carried on stiff stems. A magnificent variety for cutting.

Hugo Roller (Paul and Son, 1912).—Flowers of most elegant combination of colours; lemon yellow, edged and suffused with crimson; flowers medium size, good shape; a good grower and free flowerer.

CRIMSON, SCARLET, and MAROON.

Mrs. G. A. Van Rossem.—A sensational novelty. Large flowers on stout, rigid stems, beautifully formed, open freely, and are wonderfully scented. The colour is unique—dark golden yellow ground heavily flamed and shaded orange and apricot; the reverse of the petals often dark bronze and nearly brown in the first stages. Dark bronze green foliage, which helps to intensify the colour of the flowers.

Lady Margaret Stewart.—Deep sunflower yellow, veined and splashed orange scarlet; reverse of petals deeply marked carmine—a unique and distinct colouring, difficult to describe; long pointed buds, opening to full flowers of decorative form, deliciously perfumed.

Souvenir De Claudius Pernet.—Rich sunflower yellow, deeper in the centre. This variety commands attention, owing to its beautiful clear colour. The blooms are large, full, and held up on fine long stems. Stands the heat well.

Souvenir De H. A. Verschuren.—Rich golden yellow; larger bud than "Golden Ophelia;" strong and deliciously scented.

Shot Silk.—Deep cherry cerise, over-shot with salmon rose, with clear buttercup yellow base; vigorous and free. A rose of great excellence.

Souvenir De Georges Pernet.—Oriental red, tipped cochineal carmine, and shaded yellow. Vigorous, branching and free.

Mrs. Calvin Coolidge.—This is the best yellow rose the raisers have yet grown in the Ophelia class; except the colour, which is a deep yellow, which intensifies into a rich orange yellow as the flowers expand.

Souvenir de Madame Boulet.—Dark cadmium yellow, large and fairly full, long bud. A vigorous grower of high branching habit, beautiful bronze green foliage. An improved Louise Baldwin. Recommended as one of the finest garden and decorative roses ever introduced.

Duchess of York (Dickson and Son).—An exceedingly strong grower, with handsome foliage; flowers large, full, and fine form. Colour in young stage deep golden yellow, with tangerine centre, deepening as the flower ages to orange tangerine. A rose of exceptional merit for garden and decorative work.

Elegante (Pernet Ducher).—A very vigorous grower of spreading habit, green foliage, long sulphur-yellow bud. Large, full globular flower, cream-yellow colour. Very free flowering.

Feu Joseph Looymans.—Colour, yellow, with vivid apricot, giving a brilliant effect in the centre. Buds long and pointed, developing into well-formed blooms, suitable for exhibition and garden purposes. Awarded Gold Medal, Amsterdam, 1922. (Raised by Looymans and Sons).

Betty Hulton.—In this superb rose we add to this class a variety of absolute distinctness and outstanding merit. Colour, intense saffron yellow, with deep golden centre. Most brilliant and attractive. (Raised by Alex. Dickson and Sons, Ltd.).

C. V. Haworth.—An imposing rose; its shell-shaped, massive petals are an intense black scarlet with rich crimson pile, a most glorious colour. The blooms are of good size, perfectly formed and very freely produced; growth vigorous. Deliciously fragrant.

Chateau de Clos Vougeot.—Colour velvety scarlet, shaded with fiery red, changing to dark velvety crimson as the flowers expand. Has handsome foliage and is an admirable garden rose.

Crusader.—Large, good form; colour, rich velvety crimson; vigorous grower.

Etoile De France.—Flowers very large, and possessing petals of very good substance; of magnificent cupped form, very full and expanding freely; superb colour; velvety reddish crimson, and centre petals being a vivid reddish cerise; the flowers are very fragrant.

Earl Haig.—Deep reddish crimson, flowers of immense size and substance; perfectly formed. An excellent bedding variety, being very continuous in bloom.

E. J. Moller.—A rose of great promise, locally raised, very similar to Hadley. Free grower, free flowering; colour, deep velvety crimson.

Etoile de Holland.—Dark red buds, opening to bright; good grower and very free flowering.

Francois Dubreuil.—A very fine tea rose; colour, velvety purplish crimson, reflexed with cerise and amaranth. Buds of great beauty. It is very free flowering.

Talisman.—A very attractive and distinct novelty. Scarlet, pink, copper and gold are combined in glorious shadings. Splendid, very vigorous habit and growth; free-flowering. Fine flowers and buds (average 25 petals); large feathery foliage. Price, 2/-.

Capt. F. S. Harvey Cant.—Glorious rich salmon pink veined scarlet and suffused yellow. A well-built flower, sweetly scented and vigorous.

Gen. Gallieni.—Metallic red, varying in colour, but always good. Strong grower, and beautiful foliage.

Lady Helen Maglona.—Bright crimson, with darker tones; hardy and vigorous, with the old rose perfume.

Lord Charlemont.—Clear, glowing crimson, deepening to carmine crimson; flowers long and pointed, which keep their colour well. A fine garden rose.

Margaret McGredy.—Colour, geranium lake, but may be popularly described as orange scarlet. The colour is unfading, lasting when the blooms are wide open. Large, full and of perfect form, this is one of the most wonderful roses of recent years. Gold Medal of National Rose Society of England.

General MacArthur.—A very fine colour; bright scarlet. The blooms are of good form and are borne singly on stout stems. Sweetly scented and very free flowering. A magnificent rose, which we recommend.

E. G. Hill.—Dazzling scarlet, shading to deep pure red as it develops. It produces long stems naturally, and the foliage develops freely, and is of fine colour. It is a great producer and an unusually good keeper. The bud is unsurpassed in beauty except by the open flower, which is a wonder.

- W. F. Chaplin.**—Deep crimson shading to carmine crimson. The flowers are large, pointed and sweetly scented, whilst the growth is branching with healthy foliage.
- Kard Nal Schultze** (M. Leenders and Co.).—This variety excels in the sensational colours of the flowers, brilliant reddish crimson shading to scarlet. Blooms large, full, and of ideal form, carried on erect stems. Bud long and pointed. Very sweetly scented. Growth vigorous, erect, and continuously flowering.
- Lady Worthington Evans.**—In this sterling novelty we add another to that series of red bedding Roses represented by Red Letter Day, K. of K., and Hawlmark Crimson, which we have had the privilege of introducing, and in point of quality this supersedes them all.
- Lorraine Lee** (Allister Clarke).—A good rose for winter flowering; a rose that can't stand the heat, but a good grower and splendid acquisition for cutting winter flowering rose; pink.
- Fred J. Harrison.**—A most trustworthy and valuable addition to the crimson hybrid teas. In form, size, and substance resembling the H.P. "A. K. Williams." Of vigorous growth and free branching habit, with dark sage green foliage almost immune from mildew. The blooms, which are freely produced during the entire season, are a cardinal red colour, suffused with crimson and splashed with blackish crimson towards the edge of the petals, which are large, of great substance, and beautifully smooth. Very sweetly scented.
- George H. Macereth.**—It is possessed of vigorous growth, free branching habit, and continuous free flowering character; the blooms are carried on stiff stems; very sweetly scented. Colour, deep crimson, shaded velvety maroon.
- Hawlmark Crimson** (A. Dickson and Sons, Ltd.).—A gloriously beautiful rose whose pointed bud colourings are intense crimson crayonings and veinations on maroon, becoming crimson scarlet as the semi-double blooms develop. It is one of the most delightful decorative roses we have been privileged to disseminate; deliciously tea perfumed; its vigorous branching growth, coupled with marvellous floriferousness, will make this rose more than a popular favourite; a delightful decorative and bedding rose.
- Hawlmark Scarlet.**—This very distinct and beautiful rose adds another most valuable addition to the red colours in this section that it has been our proud privilege to produce; the colour is a brilliant scarlet; the growth is vigorous, flowering continuously throughout the season.
- Captain Kilbee Stuart** (Alex. Dickson and Sons, Ltd.).—A vigorously growing variety, with dark green foliage. The blooms are very large, good shape, with broad petals somewhat after the style of Edward Mawley. The colour is a rich velvety crimson, shaded violet. Awarded the Card of Commendation of the N.R.S.
- Duchess of Westminster** (A. Dickson and Sons, 1911).—Clear rose madder; large, full, high-pointed centre. A really first-class autumn rose.
- General Superior Jansen.**—A recent introduction with brilliant colouring; a glowing deep crimson. Large, full, deep and well formed flowers, are carried on stiff stems, freely and abundantly produced. A most striking and effective rose.
- Captain F. Bald** (1919, Alex. Dickson).—A most attractive and valuable addition to the dark section of to-day's everyone's type of rose—a class to which we have done so much to establish. The growth is vigorous and branching, each terminal being crowned with a flower bud. Its large, full, perfectly globular imbricated blooms are composed of good substance velvet, black sheened scarlet crimson shell-shaped petals. A continuous bloomer, especially in autumn, delicately fragrant. Suitable for all purposes. Awarded Card of Commendation.
- Geo. Dickson.**—Very strong vigorous upright growth, flowers of the largest size, perfect in shape and unique in colour, which is velvety black crimson; the back of the petals are heavily veined with pure crimson maroon. Delightfully scented.
- Hadley.**—An American rose of great merit, which has proved one of the finest red roses in cultivation; free branching habit, always in bloom; flowers full, perfectly formed, of a brilliant glowing scarlet. An excellent garden and exhibition rose.
- Hoosier Beauty.**—Glowing crimson, with darker veining and shading. Exceedingly free flowering, a vigorous grower, sweetly scented; holds its colour well in hot weather.
- Lady Maureen Stewart.**—Colour, a brilliant and non-fading velvety scarlet, reflex of petals being orange maroon; a strong, erect grower.
- Laurent Carle.**—Growth vigorous, erect and branching; buds long, flowers very large, of perfect form. Colour, brilliant velvety carmine. A most valuable rose either for exhibition of decorative purposes.
- Miss Rita Petersen.**—A deep rose colour, shading from cerise to dark red; inner petals coppery, outer petals well curved, shading from lemon cream at base to rich claret towards edge. A vigorous grower and profuse bloomer. A first-class garden or decorative rose.
- Penelope.**—The lower half of the flower is a dark crimson, while the centre is white with a deep red flush on the lower side of centre petals. One of the most distinct and beautiful roses in the Autumn.
- Rhea Reid.**—This splendid variety produces long shoots, which are crowned with flowers of perfect form and substance; has a splendid constitution, which resists mildew. It is said to be a great advance upon both Liberty and Richmond. Colour, rich crimson red.
- Red Radiance.**—A rose similar in all respects to Radiance except in colour, which is bright red. It is very sweetly scented, and is a strong grower.
- Souvenir de Theresa Lavet.**—Colour, deep crimson, shaded maroon; blooms are fairly large, and of splendid form. One of the best.
- Star of Queensland.**—A cross between Etoile de France and the Earl of Dufferin; colour, dark velvety crimson; growth is strong and sturdy; free flowering and sweetly scented. One of the best roses yet introduced.
- Sensation.**—A most promising rose; colour, scarlet, crimson, maroon; excellent for show or decoration purposes.
- Yves Druhen.**—Colour, blood red, flushed orange; flowers large, pointed globular, with a fragrant damask perfume; flowering continually.

COPPERY and COMBINATION SHADES.

Betty.—A magnificent rose; blooms large, and of glorious form; colour, coppery rose, shaded yellow; a constant bloomer, of very vigorous growth.

Clarice Goodacre.—A rose of exquisite form and unique colour, with most distinct perfume. Its highly polished blooms of biscuit chrome and ivory white are of faultless shape. A first-class exhibition rose.

Chas. P. Kilham.—Brilliant orange red, suffused glowing scarlet, marvellous colour; well shaped flower; strong and free. See coloured plate.

Mrs. James Craig.—The flowers, which are most abundantly and freely produced, are large, full, and of exquisite form, opening freely. The colour is salmon rose, flushed pale yellow at the base of the petals, outer petals passing to pale rosy pink. Habit is vigorous, erect and very branching.

Mrs. Amy Hammond.—A blend of ivory, amber and apricot; grows well and carries its wonderfully shaped flowers on long stems. If well grown it is a better flower than Madam Abel Chatenay. Gold Medal, N.R. Society.

Mrs. Dunlop Best.—Reddish apricot, base of petals coppery yellow; perfumed; good decorative rose.

Madame L. Hot (Bermaix Fils).—Vigorous growth, beautiful bright green foliage, large globular flower, beautiful colour, difficult to describe, reddish salmon flushed rosy salmon, shaded yellow. Long pointed bud carried erect on long peduncle; remarkably strong growth. The flowers are carried erect, and, when cut, last a long time in water.

Souvenir de R. B. Ferguson.—A most distinct and attractive rose, colour outside of buds splashed cerise and rose pink on apricot, full flower, back of petals rich apricot; front of petals shades vary between shell pink and cerise, with deep orange at base. Certificate of Merit, N.R. Society.

Mrs. Courtney Page.—Free blooming, exquisite novel colouring, which is orange cerise, with carmine shadings towards the base; most distinct petals of great size and substance; perfect shape and sweetly scented. Gold Medalist.

PINK SHADES.

Mrs. Bryce Allen.—Soft silvery rose, shapely; a good grower; free flowering, with a sweet old rose perfume.

Mrs. George Shawyer.—Brilliant clear rose of perfect shape and form, good grower, subject to mildew, but perfect in every other way.

Antoine Revoire.—Pale rosy flesh, shaded and edged bright carmine, base of petals yellow; large and shaped like a Camellia.

Reliance.—Soft pink; a beautiful rose, sweetly scented, and a very strong grower.

Columbia.—A delightful shade of rose pink, deepening as the flower ages. This is a strong variety, exceptionally free flowering, and produces splendidly shaped flowers on rigid stems.

Countess of Gosford.—The colour is salmon pink, shaded rose, the base of the petals suffused with salmon yellow; the blooms are full, large and of perfect form. One of the best.

Countess of Ilchester.—A magnificent rose, of carmine pink colour. The blooms are very large and have petals of immense size and fine finish; growth erect, vigorous and very free.

Dean Hole.—The blooms are very large, of great substance and have fine centres of elongated form; petals very large and smooth; colour, silvery carmine, shaded salmon; growth is vigorous and of free branching habit, flowering freely and continuously throughout the entire season.

Edgar M. Burnett.—Very large, full flowers, of fine shape and form, with large flesh petals, tinted rose. A great improvement on La France, and undoubtedly the most sweetly scented rose in existence. A grand exhibition flower.

Ethel Somerset.—Shrimp pink, edge of petals deep flesh coral pink, flowers large, full and perfectly formed, with high pointed centre and very deep shell-shaped petals.

Jonkheer J. L. Mock.—Growth vigorous and free; the blooms, which are produced with the greatest freedom, are carried on stiff and erect stems, and are of large size, perfect formation and highly perfumed; colour, carmine, changing to Imperial pink.

La France.—Bright lilac rose, with silvery white centre; blooms very large, of perfect form and very sweetly perfumed. A fine show bloom.

Lady Alice Stanley.—One of the best roses for garden decoration, producing large full flowers on stiff stems; colour, deep coral rose with pale flesh centre.

Maman Cochet.—A splendid rose which should be included in every collection; colour, light pink shaded with salmon yellow; blooms large and full and ideal for exhibition. The best pink rose grown.

Madame Abel Chatenay.—Rosy carmine, shaded vermillion and tinged with salmon; one of the most beautiful roses in existence; free flowering and vigorous. One of the best roses for cutting, garden and decorative purposes.

Madam Jules Grolez.—Satin china rose colour, very bright, full and finely formed; very free blooming and a good grower; one of the best for all purposes.

Annie Laurie.—Flesh pink, edges deeper golden yellow, base extending a third of the petal, large cupped, very double.

Madame Lambard.—Salmon pink, shaded rose. An old variety that is still one of the best.

Dame Edith Helen.—Pure glowing pink, not too deep. A noble flower, large, full, perfect form, strong stemmed and very fragrant. Of vigorous growth, free flowering, and opening in all weathers, this is a Rose of real merit for garden or exhibition purposes.

America.—An American introduction of distinct merit, producing long pointed buds and perfectly formed flowers of great size and substance, with "June Rose" fragrance; colour, beautiful shade of pink; vigorous growth. This rose has created a great sensation in America, and has been very highly recommended to us. Awarded Gold Medal.

Bessie Chaplin (Chaplin Bros.).—Colour, bright pink, blooms large, of great substance; strong upright growth. One of the best roses ever sent out. Awarded Silver Medal, City of London Show.

Captain F. S. Harvey Cant.—Rich salmon pink, faintly veined with scarlet and suffused with yellow; large flowers, of magnificent build, with high pointed centre; of great substance, sweetly perfumed. Suitable for exhibition and bedding purposes. (Raised by Messrs. Frank Cant and Co.).

Felicity (Clark Bros.).—A variety that will prove to be one of the best garden varieties. Its colour is a beautiful shade of mallow pink shading to cerise at the centre. Very sweetly scented.

Mrs. G. A. Wheatcroft.—The outside of petals are soft salmon pink to carmine, with orange base and a suffusion of copper all over the petals. The ends of the petal is gold at the base, shading through coppery pink to silvery rose at the tips. Awarded Certificate of Merit, N.R.S., 1929.

Mrs. W. R. McClure.—Vigorous, free branching, large flowers of exquisite form, colour brilliant, glistening salmon pink.

Mabel Turner.—Deep salmon pink, with reflex petals. Highly recommended.

Pilgrim.—Silvery pink, with outside of petals clear rose pink. Splendid shape and full, with delightful tea fragrance. Mildew proof.

Superb (F. Evans).—Colour, silvery pink, of clear soft tone with deeper shading on back of petals; flowers full, of large size and excellent form. Awards Certificate of Merit, National Rose Society; the Woosnam Silver Cup for the best rose raised by an amateur.

Ethel Somerset.—Shrimp pink, edged coral pink. A fine flower, with a long pointed centre, and fragrant.

Miss C. Ford.—Deep brilliant rose pink shading on back of petals to light rosy pink; flowers large, perfectly formed and very full; free flowering and sweetly perfumed.

Mrs. Segond Weber.—Salmon pink; large, firm petals; very full, large flowers, regular in shape and carried on stiff stems.

Rose Marie.—Light pink, deepening towards the edge of petals; pointed buds. Excellent for buttonhole purposes.

Souvenir De La Malmaison.—Colour, clear flesh with bluish edges; blooms very large and sweetly scented.

Una Wallace.—Soft, clear cherry rose, sweetly perfumed.

Yvonne Vacherot.—Very pale pink, long pointed buds of splendid form, opening to very large flowers. A first-class rose for show or garden purposes.

WHITE ROSES.

Louisa Crete.—A most beautiful rose, one of the best; very large, full, perfect form; pure white with creamy centre.

Molly Sharman Crawford.—Eau-de-nil white, becoming dazzling white as flowers expand; valuable alike for exhibition or garden.

Mrs. Foley Hobbs.—One of the very best; colour, a delicate ivory white, faintly tinged with clear pink on the edges of petals. For exhibition purposes this rose stands without a rival; tea perfumed.

Mrs. Herbert Stevens.—Probably the best white rose for general purposes; very free flowering, perfect form and a beautiful bud; unexcelled for exhibition and garden purposes.

White Ensign.—Pure white, flushed delicate cream at base of petals; medium-sized flowers, well shaped and of good substance. The blooms last longer on the plant and when cut than any rose we know, and we have confidence in saying it is one of the best white roses in cultivation.

Mrs. H. Brocklebank.—Creamy white, centre buff; a good garden and exhibition rose; very fragrant.

The Bride.—Pure white, sometimes delicately tinged with rose; very floriferous and beautiful in the buds, and a most useful rose for cutting purposes.

W. R. Smith.—Creamy white flushed and suffused with bright rose pink; flowers are large and full; a fine rose of "Mamam Cochet" type and one of the best.

White Mamam Cochet.—A sport from the well known rose, "Mamam Cochet." The habit of growth and shape of flower are identical with the parent; the outside petals are white, shaded with rosy blush, the centre almost pure white, a variety that every rose grower should plant.

Caledonia.—Colour, ivory white, long pointed buds, produced on stiff stems, beautiful form; one of the very best white roses grown. Highly recommended.

H. T. Swansdown (A. Dickson).—Colour, white; shading of cream at base during autumn. Bud, large, long-pointed. Bloom, full, beautiful spiral formation. Petals stout, very large, long and deep. Fragrance very sweet. Growth vigorous. Habit, very free branching, making fine, well balanced bush. Blooming, exceptionally free and continuous. Free from disease. Awards—Certificate of Merit, N.R.S.; Award of Merit, R.H.S.; Award of Merit, R.A.S. A most attractive and handsome rose. Dwarfs only. 2/6 each.

POLYANTHA ROSES.

The polyantha is a dwarf variety of Rose, carrying clusters of small blossoms.

The growth is never much more than 18 inches, but the flowering is continuous and very prolific. For bedding purposes they are unexcelled, each truss of blooms being a bundle of beauty.

The following is a list of the very best varieties:—

A. M. Pavill.—One of the best Polyanthas; colour, pure white; blooms produced in large clusters; free flowering.

Borderer.—Colour difficult to describe, but shades of pink, copper and amber go together to make a very charming and distinct rose; wonderfully free flowering and an excellent bedder.

Next Federal Deposit Bank, 117 Queen St., Brisbane

Ellen Poulsen.—Dark brilliant pink; large, full and sweet scented. Vigorous bushy habit and most floriferous.

Eugenie Lamesch.—Brilliant ochre yellow, turning to pale yellow tinted rose; sweetly scented dwarf and bushy.

Ideal.—Dark crimson; excellent for decorative purposes.

Madam M. Levavasseur.—Flowers like Crimson Rambler in colour and form, but of dwarf habit.

Miss Edith Cavell.—A red sport from Orleans; profuse bloomer; free grower; a much admired addition of the Polyantha family.

Orleans.—Brilliant geranium red, suffused rose, with white centre, making a charming combination; very fine. One of the best dwarf Polyanthas ever raised.

Our Allies.—Colour, shell pink; free flowering and very beautiful.

Papa Hemery.—Vivid vermillion red, white centre; single flowers, forming large trusses; free flowering.

Perle D'Or.—Nankeen yellow with orange centres, single flower, forming large trusses; free flowering.

Snowball.—White; splendid for cutting; very free flowering.

Golden Salmon.—A new colour in the rose world. Intense fiery golden salmon, of wonderful beauty. Flowers, medium to large, produced in large, full clusters.

Rufus.—Rich and intense crimson, in good, compact, clusters.

Tip Top.—Yellow, running to deep crimson; perfect form in the bud stage and effective when opened.

Shell Pink Radiance.—Colour as name implies, identical in growth to the pink and red Radiances. Highly recommended.

Caledonia.—A very fine, pure white, good grower and free flowerer.

CLIMBING ROSES.

YELLOW CLIMBERS.

Climbing George Schwartz.—A climbing sport from the beautiful yellow rose, Geo. Schwartz. It is a vigorous grower, and will prove a great acquisition.

Climbing Lady Hillingdon.—A climbing sport from the well known Lady Hillingdon; colour, a deep apricot yellow, shaded fawn; buds long and pointed; very free flowering; one of the best.

Climbing Sunburst.—A strong climber, sported from the well-known parent of the same name; colour, cadmium yellow.

Cloth of Gold.—Sulphur yellow; nice in the bud; foliage dark green; very strong grower.

Marechal Neil.—Rich golden yellow, very large, full, and of excellent form; highly fragrant and free; a grand old favourite.

WHITE CLIMBERS.

Frau Karl Druschki.—A climbing sport of the well-known dwarf; one of the best climbers; colour, pure white.

Kaiserin Augusta Victoria.—A climbing sport from the dwarf, of vigorous growth, and without doubt the best climber of its colour, which is creamy white.

La Marque.—White centre, tinged yellow; free, and of good habit; one of the best climbers introduced. Highly recommended.

White Mamam Cochet.—A strong climbing sport from Mamam Cochet; colour, flesh, shaded with carmine and yellow.

Fortunia.—Large flowering banksia type, pure white, exceptionally free, deep evergreen foliage.

RED CLIMBERS.

Climbing Chateau De Clos Vouget.—Flowers, velvety scarlet, shaded with fiery red, changing to dark velvety crimson.

Black Boy.—Velvety crimson; shaded blackish maroon and fiery scarlet.

Crimson Rambler.—A strong grower and profuse bloomer, borne in clusters, each of which contain 15 to 30 blooms, bright crimson.

Climbing Hadley.—A sport from the well known dwarf variety (raised at our own nursery); extra strong grown, sweetly scented and very free flowering; a rose of very high merit; should be grown in place of the dwarf Hadley.

General MacArthur.—Perhaps no climbing sport of recent years will be so generally welcome as this, which possesses all the good points of the parent; colour, bright scarlet.

Laurent Carle.—A climbing sport from this magnificent rose, worthy of a place in every garden; colour, brilliant velvety carmine.

Reine Marie Henriette.—Bright rosy red, sometimes crimson; large and of good form; free flowering; one of the best varieties introduced.

Souvenir De Theresa Levet.—Flowers of the richest dark velvety red, shaded amaranth; perfect shape for spray and buttonhole bouquets; good climbing habit.

Climbing Hoosier Beauty.—Rich crimson, delicious fragrance, free bloomer and good grower.

Miss Marion Manifold.—Bright velvety scarlet; a splendid grower, always in bloom. One of the most popular red climbing roses.

PINK CLIMBERS.

Climbing Mamam Cochet.—A magnificent climbing sport from the well-known favourite; colour, flesh, shaded with carmine and salmon yellow.

Columbia.—A climbing sport of this magnificent rose; colour, a delightful shade of rose pink, deepening as the flower ages.

Dorothy Perkins.—A very sweet and profuse bloomer; colour, pink, blooms being produced in clusters; splendid for covering pergola or arch.

Climbing Madame Butterfly.—A delicate pink, flowers refined and very sweetly perfumed.

Climbing Madam Abel Chatenay.—Salmon pink, strong grower and free bloomer.

Climbing Radiance.—Carmine pink, shaded salmon, very vigorous and free bloomer.

Climbing Mrs. George Shawyer.—A delightful shade of pale pink, beautifully shaped blooms of great size. Makes good growth; quite first-class.

DAHLIAS

SEASONABLE DAHLIAS.

The majority of varieties offered are of the most modern type, stiff wiry stems, and bulbs are sent out in perfect condition for planting on arrival.

We guarantee every bulb to strike, consequently, you run no risk in buying your supplies from us.

N.B.—As we have a limited supply only of some varieties, we recommend to place your order early.

In the event of being sold out, we reserve the right to substitute, unless instructed to the contrary.

We have pleasure in offering for seasonable planting time, a very choice lot of Dahlia Tubers, grown to our order by one of the most reliable Continental growers of Europe.

The best months to plant are OCTOBER, NOVEMBER, and DECEMBER. Bulbs planted any of these months bloom three months hence, and continue blooming until very cold weather sets in.

The plants are less subject to diseases such as thrip, red spider, etc., if planted during the months mentioned.

DECORATIVE DAHLIAS.

Aviateur.—A most striking variety; colour bright bronze-orange. Flowers carried on long strong stems. 2/- each.

Tommy Atkins.—Flaming red, blooms large and of good substance. Brightest red in cultivation. Price, 1/6 each.

W. D. Cartwright.—Enormous flowers of deep orange at base, yellow at tips. Price, 2/- each.

Cerise Queen.—A wonderful colour combination of cerise-red, with silvery pink shadings. Extra strong grower. Price 2/- each.

Champagne.—Champagne colour. Price, 1/6 each.

Cigarette.—Creamy white edged bright orange. Price, 1/6 each.

Couronne D'Or.—Rich golden apricot. Price, 1/6 each.

Jane Cowl.—Warm buff and old gold. Free flowering. Price, 1/6 each.

Jack Dempsey.—Colour bright purple. Splendid for cutting. Price, 1/6 each.

El Toreador.—Extra fine variety with a magnificent warm salmon orange colour. Excellent for cutting. Price, 1/6 each.

Flamboyant.—A dahlia of great merit. Colour a very bright scarlet to almost flame. Price, 1/6 each.

Geisha.—Scarlet and yellow. Very rare. Price, 1/6 each.

Emma Groot.—Rose mauve, big flowers. Price, 1/6 each.

H. B. Hay.—Yellow at centre, with pink; tipped white. Price, 1/6 each.

Hera.—Soft lilac rose. Price, 1/6 each.

Thomas Hay.—Colour clear lilac. Flowers deep, full, and massive. Price, 1/6 each.

Jack Hobbs.—Cream at centre, shading to nearly white at tips. Price, 1/6 each.

Insulinde.—A tawny old gold flower. Price, 1/6 each.

Islam Patrol.—A dark velvety scarlet; edged gold. Price, 2/- each.

Jersey's Beacon.—Chinese scarlet, with a paler reverse.

Jersey's Beauty.—Salmon Pink. Glorious flower. Price, 1/6 each.

Mabel Lawrence.—Deep crimson scarlet. Very large. Price, 2/- each.

Marmion.—Golden yellow, with a suffusion of gold. Price, 2/- each.

Millionaire.—Lilac very free flowering. Price, 1/6 each.

Pink Favourite.—Royal pink. A most fascinating colour. Price, 1/6 each.

Rapallo.—Sealing wax red, with golden edged petals. Price, 1/6 each.

Rookwood.—Colour bright deep mauve, large blooms of good substance and good centre. Price, 1/6 each.

Royal Pink.—Novelty of special merit. Colour fine soft lilac pink. Flowers borne on long wiry stems. Price, 1/6 each.

Mrs. Carl Salbach.—Lavender pink. Price, 1/6 each.

Dr. Gr. of Van Shwerin.—A very free flowering variety. Colour unique. Light cream shaded soft lilac. Price, 2/- each.

Ellenor Vanderveer.—Satin rose pink. Price, 1/6 each.

Sheila Ward.—Yellow, heavily tipped white. Flowers borne on long wiry stems. Price, 1/6 each.

Mrs. J. De Ver Warner.—Mauvy pink, large and free flowering. Price, 1/6 each.

- Zonsondergang.**—Beautiful burnt amber shading to orange. Price, 1/6 each.
- J. Emberson.**—Excellent garden and decorative variety. Colour pink, with soft yellow shadings. Price, 1/6 each.
- E. F. Fellows.**—Light orange, strong grower, and free flowering. Price, 1/6 each.
- Golden Sonne.**—Colour ambergold; one of the best and most popular varieties. Price, 1/6 each.
- Frau Marie Heinemann.**—A new introduction of very high recommendation. Colour flesh pink. Price, 1/6 each.
- Lilac Glory.**—Colour, bright lilac flowers, produced on stiff wiry stems. Price, 1/6 each.
- Margareth.**—Pure white; an acquisition of this family. Price, 2/- each.
- Mary Murray.**—One of the most magnificent and best cactus dahlias. Stem and form of flower are perfect in every way. Colour light orange. Price 2/- each.
- Neptun.**—This particular variety is highly recommended, having obtained first class certificate on the continent of Europe. Colour pure white. Price, 1/6 each.
- Edith Page.**—An extra classical variety. Colour salmon pink. Price, 1/6 each.
- Signal.**—A very fine cactus with dark coral salmon shadings. Price, 1/6 each.
- Southport.**—Pure cactus, good habit, free flowering. Colour, orange yellow. Highly recommended. Price, 2/- each.
- Harry Strutt.**—Large carmine red. Flowers borne on long wiry stems. Price, 2/- each.
- Talisman.**—Deep red dark crimson. Price, 1/6 each.
- Jhn. G. F. Van Tets.**—Giant cactus; pure white; stiff, wiry stems. Price, 1/6 each.
- Richard Throughton.**—Colour rich salmon, with light yellow base. A very fine English cactus. Price, 1/6 each.
- Frank Fort (Decorative).**—A glorious yellow, tinted orange red. A magnificent bloom of enormous size; fit for any show table. Price 2/6.
- F.T.D. (Decorative).**—A magnificent dahlia. A most handsome bloom of Radiance Pink. Flowers borne on long stiff stems. Show blooms measure 10 inches across. Price 2/6.
- Chermain's Masterpiece (Cactus).**—This special Dahlia has excellent qualities both for show and garden purposes. The blooms are enormous, borne on long stiff stems. Colour deep Radiance Pink. Price 2/6 each.

CALADIUM BULBS.

For years past Caladiums have been one of our specialities. After many years' cross hybridisation from selected varieties, we have been successful in raising a wonderful variety of the most gorgeous colourings ever sent out in Australia.

The Bulbs we offer are large, sound, and clean, and we can recommend them with every confidence. Our stock of five thousand larger bulbs we offer at reduced prices. Order early.

PRICE, 2/- EACH, or 20/- DOZEN.

NOVELTIES.

(DECORATIVE).

- Bloemenbinders Ideal.**—An extraordinary fine dahlia. Colour dark salmon pink on light golden yellow ground. Price, 2/6 each.
- Han's Kanterbunt.**—A new introduction of the highest qualifications. Colour bright red, with white markings. Stock limited. Price, 2/6 each.
- Carl Red Emperor.**—Immense flowers, having a diameter of ten inches, which are borne on extra long, strong stems. Colour intense scarlet red. Price, 2/6 each.
- Clown.**—A novelty of great attraction. The fine colour combination of red and white is so striking that it attracts the attention of everyone. Price, 2/- each.

CACTUS DAHLIAS.

- Ambassador.**—Large flower, clear yellow, salmon shadings in centre. One of the best exhibition varieties. Price, 1/6 each.
- Andreas Hofer.**—Pink and carmine yellow centre. Price, 1/6 each.
- Ballet Girl.**—A most popular variety, pure cactus form. Colour combination of red and white. Price, 1/6 each.
- Bourgogne.**—Deep wine red. Large flowers. Price, 1/6 each.
- Madam A. Breuls.**—A new introduction of extra fine quality. Colour vivid pink. Price, 1/6 each.
- Jean Chazot.**—Enormous flower. Deep terra-cotta. Very free flowering. Price, 1/6 each.

NOVELTIES.

(CACTUS).

- Frau O. Bracht.**—Sulphur yellow. Most wonderful variety. Price, 2/- each.
- Gaiety.**—This new introduction is a Challenge Cup winner. Colour, dark magenta. Price, 2/6 each.
- White Wonder.**—A most desirable variety, excellent shape. Colour clear pure white, of splendid keeping qualities. Award of merit, gaining first honours on continent of Europe. Price, 2/- each.

CRYSANTHEMUMS.

CULTIVATION OF CHRYSANTHEMUMS FOR GARDEN DISPLAY.

Chrysanthemums are best grown in beds by themselves in an open position sheltered, if possible, from strong winds. In August give the beds a dressing of lime, a handful to the square yard, and turn soil over in a rough state to sweeten.

In September cover the beds with old horse manure, say one inch in depth, and work it through the soil. A dressing of $\frac{1}{4}$ lb. bone meal and 1 oz. of superphosphate to the square yard and lightly forked in will complete the beds.

When the young plants get over the shift and are growing nicely nip off the top when the plant will break out into several branches. Allow four of the best placed to grow and rub the others off. When

the selected branches have grown about 9 inches long, nip off the tops as before, and from this break allow 3 branches to grow; each plant will now have 12 branches. All side shoots on the stems must be rubbed off as they appear.

In February the buds will form in clusters at the top of each branch and when these are large enough, retain the large bud in the centre and rub the others off, or nip off the centre bud and retain three of the smaller buds and the plant will now have 12 or 36 buds as the case may be. During the hot summer months the plants will greatly benefit by a top dressing of half rotted manure and a dusting of superphosphate. Stakes should be inserted at the time of planting, and each branch tied separately to facilitate cutting the blooms.

JAPANESE CHRYSANTHEMUMS.

Carriage extra.

Price: 1/- each; 10/- dozen.

Alf. Forbes.—Amaranth.

Alice Benson.—White.

Annie Laurie.—Brown and Golden; long stems.

Autumn Tints.—Rosy salmon, buff-creamy yellow reverse.

Lime Sulphur Wash.—A splendid fungicide for the destruction of black spot, mussel scale, curl leaf, scab, etc., and for fungus growth on trees. Winter spraying, 1 gallon to 9 gallons water just after the leaves fall. Summer spray, 1 gallon to 32 gallons of water.
Nicotine Sulphate (Black Leaf 40).—A safe insecticide against aphids, apple bug, thrip, etc. 1 oz. bottle, 1/6; 2 oz., 2/6; 4 oz., 4/6.
Pestend.—Effectively destroys insect life and protects seedlings from slugs. 1 lb., 6d.; 7 lb., 2/6; 28 lb., 7/6.
Red Oil ("Gargoyle").—For scale, woolly aphids, etc. 1 pint tin, 1/6; ½ gall., 3/6; 1 gall., 5/6.

HORTICULTURAL REQUISITES.

INSECTICIDES AND SPRAYING MATERIALS.

- Arsenate of Lead Paste,** for all leaf-eating and sucking insects.—½ lb. jars, 1/6; 1 lb., 2/6; 2 lb., 4/6; 7 lb. at 1/6 lb.; 14 lb. at 1/3 lb.; 28 lb. at 1/- lb. 60 lb. at 10d. lb.; 112 lb. at 9½d. lb.
Bordeaux Mixture, specially effective for Leaf Curl on peach trees, Black Spot, Scab, etc. A tested preparation for the prevention of Tomato Wilt. A soil sterilizer, and specially helpful to Iceland Poppies, Asters, Antirrhinums, etc. 2/6 lb.; ½ lb. for 1/-.
Destruxol.—The All-in-One-Spray.—Kills Like Lightning, and its efficacy can be seen on any affected plants in orchard, field, or garden very speedily. The best contact and fumigating spray known, and is unequalled for the destruction of green and woolly aphids, red spider, thrip, mealy bug, scale, and for the effective control of mildew. One quart makes 150 to 200 gallons of spray solution. 1 oz.

makes 3 to 5 gallons. Prices: 1 oz., 2/-; 2 oz., 3/3; 4 oz., 4/6; ½ pint, 10/-.

- Flowers of Sulphur,** for dusting on roses, etc. for mildew. 6d. lb.; 7 lb., 2/6; 28 lb., 8/-.
Lime Sulphur Wash.—A splendid fungicide for the destruction of black spot, mussel scale, curl leaf, scab, etc., and for fungus growth on trees. Winter spraying, 1 gallon to 9 gallons water just after the leaves fall. Summer spray, 1 gallon to 32 gallons of water.
Nicotine Sulphate (Black Leaf 40).—A safe insecticide against aphids, apple bug, thrip, etc. 1 oz. bottle, 1/6; 2 oz., 2/6; 4 oz., 4/6.
Pestend, effectively destroys insect life and protects seedlings from slugs. 1 lb., 6d.; 7 lb., 2/6; 28 lb., 7/6.
Red Oil ("Gargoyle").—For scale, woolly aphids, etc. 1 pint tin, 1/6; ½ gall., 3/6; 1 gall., 5/6.

Ornamental and Flowering Shrubs.

No garden can be said to be complete without trees and shrubs. They add considerably both to the appearance and value of a home, are easily grown, and require little attention. Many have ornamental decorative foliage, and others are useful for cut blooms at various seasons of the year.

The following varieties have been chosen as being the most suited to the Queensland climate:—

Price, 2/- each, except where otherwise stated.

D.S. signifies Deciduous Shrub; E.S. signifies Evergreen Shrub.

Acalypha.—Popular for lawns, hedges and odd corners; has pretty variegated foliage, and grows up to 10 ft. in height. Several varieties. E.S.

Azalea.—One of the most gorgeous of our early spring flowering shrubs, a dwarf and compact grower, having flowers from pure white to deep crimson, according to species. E.S. Price from 2/6 each, according to size. (See special list).

Camellia.—A well-known shrub, with a graceful and compact habit. Bears a profusion of lovely flowers throughout the Autumn and Winter months. Our stock comprises many varieties, ranging in colour from pure white to deep red. E.S. Price, 2/6 to 3/6 each; according to size.

Crotons.—These are most attractive in the garden. They grow well in Queensland's tropical climate, and do particularly well in the coastal districts. We have a large selection of gorgeously coloured varieties. Price, 2/- each.

Gardenia.—The most popular shrub grown in Australian gardens. During Spring its branches are literally clothed with large pure white flowers of exquisite fragrance. Price, 1/6 each.

Habrothamnus Elegans (false Jasmine or Cestrum).—A free flowering shrub like a giant Bouvardia, producing tubular purplish red flowers in large dense drooping panicles. Price, 1/6 each.

Hibiscus.—This showy shrub thrives remarkably well in Queensland, flowering profusely and almost continuously in the more favoured coastal districts. We thoroughly recommend the following choice varieties:—

General Courtigis.—A delightful crimson.

Grandiflora.—Single Scarlet.

Peach Blow.—Double Peach Pink.

Lambertii.—Double Crimson.

Conqueror.—Single Buff.

Island Empress.—Double rich Pink.

George Harwood.—Single Pink.

Rose Scott.—Light Red. White centre.

Hydrangea.—This splendid old favourite does best in shady situations. It grows about 4ft., and is suitable for planting in large pots or tubs for verandah use. We have three species—White, Pink and Blue. D.S.

Lagerstroemia.—A very handsome free flowering evergreen. D.S. Price, 2/- each.

Lasiandra Macranthia.—A graceful and distinct shrub about 7ft. high when fully grown. Bears a profusion of large, showy, rich violet-blue flowers, 3 to 4 inches in diameter. E.S.

Magnolia Fuscata (Port Wine).—A most beautiful evergreen shrub, producing sweet scented blooms of chocolate and cream colour. Price, 2/6 each.

Murraya Exotica.—A native evergreen. It grows from 4ft. to 8ft. high, and produces white flowers having a similar perfume to orange blossoms. E.S.

Nandina Domestica.—The Sacred Bamboo of Japan; has handsome dark green foliage. Grows to 6 ft. in height, and is very useful for floral work. E.S.

Oleander.—Very beautiful plants, and are classed amongst the best and hardiest of summer-flowering shrubs. We have them in various shades of colour. E.S.

Poinsettia Pulcherrima.—A remarkably showy shrub, each branch being surmounted by large vermillion bracts, which develop in Winter and make a magnificent display. D.S. Price, 2/- each.

Raphiolepis Indica (Indian Hawthorn).—A handsome evergreen shrub, growing from 4ft. to 6ft. high. Has foliage like green velvet, and bears a profusion of pink and white flowers in early Summer and Autumn. E.S. Price, 1/6 each.

Spirea (or English May).—A hardy, easily cultivated shrub, and one of the most floriferous and attractive flowering plants in existence; nice foliage and good bloomer. Single or double. Price, 1/6 each.

Tecoma Capensis (Trumpet Flower).—A beautiful shrub, which makes a good hedge. Crimson. E.S.

Tecoma Stans.—A showy and beautiful shrub, producing clusters of yellow flowers. It attains a height of 15ft., and withstands heat and drought well. E.S.

AZALEAS.

Price 2/6 each; 25/- dozen.

These wonderfully beautiful flowering shrubs are equally adaptable for use as single specimens or for grouping, and if one has sufficient room and is a lover of flowers and brilliant colourings, nothing can give greater pleasure than a group of different coloured Azaleas. Here are a few of the best varieties.

Charles De Buck.—Large rosy purple; one of the best.

Charmer.—Bright Amaranth; large and fine.

Duc de Nassau.—Large dark, rosy purple.

Dame Melaine.—Bright rose, edged with pure white, carmine blotch.

Duetsche Pele.—A glorious double white; early blooming.

Empress of India.—Rosy salmon, with deep carmine spot on upper petal, and edged with white; semi-double.

Magna Alba.—Large single white.

Madame M. Oerschafelt.—Variegated pink, shaded white.

Princess Charlotte.—Beautiful single rose.

Rhode Holland.—Bright scarlet, strong grower.

And many other varieties.

LAGERSTRÆMIA

A very handsome free flowering shrub, a most conspicuous flowering plant. Hardy and easily grown. We can supply the following species:—

- Lagerstræmia Matthewsii.**—Pure lavender, beautiful trusses. Price, 2/6 each.
Lagerstræmia Eavsii.—Flowers lilac, strong grower, very free flowering. Price, 2/- each.
Lagerstræmia Indica.—Coral red. Price, 2/- each.
Lagerstræmia Rosea.—Rose pink. Price, 2/- each.
Lagerstræmia Alba.—Pure white. Price, 2/- each.
Magnolia Grandiflora.—A handsome evergreen flowering tree, producing large lily-like blossoms (white), sweetly perfumed. Price, 2/6 each.
Buddlea Veitchanum.—Large spikes resembling the purple Lilac, both in shape and colour. Price, 1/6 each. A very useful flowering shrub.
Ochna Scabra.—A very useful evergreen shrub, producing flowers in clusters; colour, red and creamy white. Well worth a place in any garden. Price, 2/- each.
Toxicophlæa Spectabilis.—Evergreen shrub, producing flowers (white), perfumed. Price, 2/- each.
Rudbeckia, or Golden Glow.—A Herbaceous flowering plant, hardy and producing trusses of golden yellow blossoms. Price, 1/- each.

CREEPERS.

For covering unsightly fences, arbours, training up verandah pillars, and other similar purposes, these plants are altogether indispensable. Several of the varieties are admirably adapted for training up poles in the garden or shubbery, and if a little care is bestowed on them they will produce a most beautiful effect amongst other plants.

Price 2/- each, except where otherwise stated.

D signifies Deciduous. E signifies Evergreen.

- Ampelopsis.**—A rapidly-growing ornamental climbing plant, well adapted for covering walls of any aspect. In Autumn its rich red and brown leaves give a charming effect. D. Price, 2/- each.
Antigonon leptopus.—A charming slender creeper, producing an abundance of pink flowers. D.
Bougainvillea.—There are many varieties of Bougainvilleas, all of which are extremely beautiful and splendid climbers and creepers. The following varieties we highly recommend:—
Badgen's Beauty.—Rich purple with white centre, very free flowering. Price, 2/- each.
Magnifica Laterita.—A very fine variety. Colour brick red. Price, 3/6 each.
Magnifica.—Colour, purple-mauve. Price, 2/- each.

BOUGANVILLEA.

Madame Clara Butt or Crimson Lake.—A new specie of Bougainvillea recently introduced from California. The plant is a strong grower, the foliage being dark green and attractive in appearance. The colour is a Rich Crimson Lake, and can be described as a very rare and distinct shade in Bougainvilleas.
 Supplies very limited. Price 5/- each.

- Beaumontia Grandiflora.**—A magnificent flowering climber, producing large white trumpet-shaped flowers; highly perfumed. E.
Ficus (Creeping Fig).—A very fine creeper for covering a wall or fence; leaves are small and clinging, and the shoots, having small roots, make fast to anything against which they are trained. E.
Gelsemium Sempervirens.—A beautiful climber, producing flowers of a deep yellow colour with protruding anthers. E.
Hedera (Ivy).—Ivies thrive well anywhere, and no garden or ground should be without them. The variegated varieties are particularly fine. E.
Lonicera (Honeysuckle).—The well-known scented flowering climber; of fine foliage and quick growth. We have several varieties. E.
Mandevilla suaveolens.—A beautiful deciduous creeper, bearing lovely white flowers and having fine foliage. D.
Phaseolus Caracalla.—A splendid climber, with full foliage, producing clusters of lovely lilac flowers, which are shell shaped. Very curious. E.
Quisqualis Indica.—A pretty creeper, producing beautiful sweet-scented flowers of orange and crimson on the same racemes. E.
Rhynchospermium Jasminoides.—A beautifully perfumed white-flowered creeper of quick growth and fine foliage; it is evergreen and hardy, except in the coldest districts. Splendid for training over fences, etc. E. Price, 2/- each.
Stephanotis Floribunda.—Wax-like foliage; the flowers, which are produced in abundant clusters, are pure white and very fragrant. E.
Solanum Wendlandi.—A superb summer flowering vine, which blooms continuously. The colour is an attractive lavender blue. A strikingly beautiful plant. We also have a white variety. D.
Thunbergia Laurifolia.—A magnificent free flowering plant of great beauty, bearing large blue flowers.
Wisteria.—Produces in early Spring long racemes of beautifully scented flowers. They are hardy, and when well established grow rapidly. We have two colours—white and lavender. E.

BOUGAINVILLEA THOMASII.—This is the best of the Bougainvilleas, the colour being a beautiful rose pink. It is a splendid climber and creeper, and its magnificent appearance entitles it to a place in every garden. Be sure and get one of these. Price, 2/6 each.

IPOMÆA HORSFALLII.—Flowers are trumpet-shaped and produced in clusters, and are of a beautiful sheeny deep shell pink laid over in small pleats. The foliage is a beautiful bright bottle green, quite in keeping with the stately magnificence of the flowers; ordinary good garden soil will suit it. Price, 3/6 to 5/- each.

JASMINUM.

- Fruticans.**—Yellow Jasmine, 8ft. Price, 1/6 each.
Gracilis.—White, 5ft. Price, 1/6 each.
Grandiflorum.—White, 10ft. Price, 1/6 each.
Poicocium.—White, star-like flowers, 8ft. Price, 1/6 each.
 Jasmines all produce sweetly-scented flowers, and can also be grown as shrubs.
Phaseolus Carracalla (Snail Flower).—Slender climber, with full foliage, producing clusters of lovely lilac flowers, shell-shaped; sweetly scented. Price, 1/6 each.
Thunbergia Gibsoni (Golden Glory Creeper).—A very beautiful creeper, producing blooms of orange shade; borne in clusters. Price, 2/- each.

BIGNONIA.

- Bignonia Grandiflora.**—A very strong grower, producing blooms of orange red. 2/- each.
Bignonia Rosea.—A strong growing, handsome creeper, producing blooms of lovely rose colour.
Bignonia Lindeyana.—Strong grower, producing large lavender blooms.
Bignonia Venusta.—The most popular and hardy creeper, quick grower, producing flowers of orange colour; borne in clusters.
Bignonia Jasminoides.—Evergreen, bright green foliage; flowers rose and white; quick grower.
Bignonia Tweediana (Catsclaw Creeper).—Extremely hardy, suitable for covering fences or unsightly buildings. Colour, rich golden yellow.

PINES AND CUPRESSUS.

- These are the most largely grown of all the Conifers. They can be grown both as a hedge and a breakwind, or as specimen plants.
Cedrus Deodora.—One of the most ornamental trees that have yet been introduced. It is perfectly hardy and stands heat, cold or drought with impunity. Recommended for extensive planting. Price, 2/6 each.
Sempervirens Horizontalis.—A beautiful quick grower, attaining a height of 50 ft. Price, 2/- each.
Sempervirens Stricta.—An excellent upright variety. Price, 2/- each.
Torulosa.—An elegant and compact growing tree, which stands drought and is very hardy; a splendid shelter or breakwind. Price, 2/6 each.
Lambertiana Horizontalis.—This is, without exception, the finest of the whole genus, and is a tree of very rapid growth. It succeeds well in any description of soil if properly worked, and for all kinds of ornamental planting, or for shelter, it is one of the finest trees in cultivation. Strong grafted trees. Price, 3/6 each; 36/- dozen.
Lambertiana Horizontalis Aurea.—This is a most handsome and distinct variety of the horizontal branching variety. It has the good points of Horizontalis, and its chief attraction is its bright golden coloured foliage. In every respect it is a tree which we highly recommend. Price, 3/6 to 5/- each.

HEDGE PLANTS.

We can recommend the following:—

- Privet.**—Large or small leaf evergreen. Price, 25/- per 100.
Tecoma Capensis.—Bright red flowers. Price, 1/- each; 10/- dozen.
Duranta.—Blue flowering, very hardy and thorny. Price, 25/- per 100.
Clereodendron Inirmie.—Everygreen, small green leaves, the best of all hedges for hot climates. Price 25/- per 100.
Cupressus Lambertiana Horizontalis.—Evergreen; make excellent hedge and break wind. We recommend to plant 6ft. apart. Price, 3/6 each or 36/- per dozen.

SHADE TREES.

Price, from 1/6 upwards, according to size and variety.

- Acacia.**—Wattles are delightful trees, and, being the National Emblem of Australia, everyone should grow them. They succeed almost anywhere, and few shrubs require less attention. E.T.
Calodendron Capense.—A very handsome evergreen tree. Flowers are white, with pink markings in centre. E.T.
Camphora Officinalis.—A beautiful neat-growing shrub, which does well in hot climates. Admirable as an avenue tree. E.T.
Eucalyptus.—These make splendid shade trees, and are of easy culture. Some of the varieties are very popular on account of the magnificent trusses of bright-coloured flowers they produce. E.T.
Grevillea Robusta.—A great favourite, which grows very quickly. It is very handsome and fragrant when in blossom. Thrives best sheltered among other trees. E.T.
Jacaranda Mimosaefolia.—A beautiful little tree with Mimosa-like foliage and magnificent flowers. A well-grown specimen is the admiration of everyone. D.T.
Macadamia Ternifolia (Queensland Nut).—A beautiful evergreen shade tree, producing very valuable nuts.
Magnolia Grandiflora.—A pretty ornamental tree, with dark glossy leaves. It produces a very large pure white blossom, sweetly scented. Price, 2/6 each.
Poinciana Regia.—The foliage of this beautiful shrub resembles a bird, and is very graceful and unique. D.S.
Schinus Molle.—A beautiful, fast growing, graceful tree; light green foliage and bright scarlet berries; leaves have a strong aromatic scent. E.T.
Sterculea Acerifolia.—A tree of fine, sturdy, pyramidal growth, with large handsome foliage; produces masses of scarlet flowers, which are thrown out well above the foliage. E.T.
Ficus Benjamani (Weeping Fig).—One of the most graceful shade trees (evergreen). The habit of this particular tree being of a weeping nature, and the dark green foliage being very attractive. Strong plants 2/- each.

FRUIT TREES.

INTRODUCTION.

All Fruit Trees are grown to our special order; careful attention given to root cultivation, and to see that every tree is grafted (where necessary), from selected STOCK TREES.

Especial care is given to labelling young plants in the NURSERY, so that no mistake is made as regards variety.

The best months to plant are MAY, JUNE, JULY, and AUGUST.

We take every care to pack trees so that they will carry to destination safely.

N.B.—Any variety of tree required and not mentioned in our list we will endeavour to procure at lowest cost.

CITRUS FRUITS

(GRAFTED TREES).

Price 2/- each; 22/6 dozen.

Special quotation for lots of 100 or more.

MANDARINS.

Price 2/- each; 22/6 dozen.

Beauty of Glen Retreat.—A seedling raised near Brisbane, and is pronounced by experts to be far superior to any other kind for hot climate.

Emperor.—Fruit very large; a regular bearer, which is extensively grown for market. Same description as scarlet with this difference, the skin is yellow.

Ellendale Beauty.—A Queensland seedling, said to be an improvement on Beauty of Glen Retreat; larger and sweeter; good carrier and early.

Excelsior.—This variety is not generally known; it is an excellent grower and very productive; a variety well worth a trial.

Fewtrill's Early Shipping.—A cross between an orange and mandarin, being practically the earliest mandarin known, fruiting very early, and is a very good carrier.

Navel.—A variety of the thorny fruit, solid, almost as large as Emperor; sweet and very fine flavoured; strong growth; foliage larger than the old Thorney.

Parker's Special.—A Queensland seedling, of larger size and equal in quality to Beauty of Glen Retreat. The fruit ripens earlier in Queensland.

Scarlet.—Large handsome fruit, skin almost scarlet; fleshy, juicy.

Thorney.—Small and solid; unsurpassed for excellence in flavour and an immense bearer.

ORANGES.

Price 2/- each; 22/6 dozen.

Golden Nugget Navel.—Fruit very smooth, solid and even, thinner skinned than Washington Navel; fruit exceptionally free from rag, and seedless.

Jaffa.—Fruit large, nearly seedless; oval, thin-skinned; tree thornless; a good bearer.

Joppa.—Tree of strong growth and very attractive fruit of nice size, and the very best quality.

Mediterranean Sweet.—Remarkable for its early bearing and later ripening; splendid flavour; tree nearly thornless; a fine market variety.

Navelencia.—A cross between Valencia and Washington Navel; it retains the good qualities of Washington Navel, together with the hardiness and lateness of Valencia.

Sabina.—A splendid all-round orange; medium sized, mid-season.

Siletta.—Medium size and thin-skinned; trees of very distinct growth; prolific market variety.

St. Michael.—Fruit of largest size; skin deep yellow, smooth and thin; very juicy, with few seeds; hardy and profitable market variety.

Thomson's Navel.—Fruit of medium size, smooth and thin skinned, sweet and richly flavoured; the earliest of all oranges to ripen, and an excellent market variety.

Valencia.—A good-sized round orange; skin smooth and thin; especially valuable on account of its lateness of ripening; splendid flavour; also hangs well.

Washington Navel.—Fruit in all respects equal or superior to the Bahia Navel; a very good cropper and is considered the very best of all oranges.

GRAPE FRUIT.

Price 2/- each; 22/6 dozen.

Marsh's.—An excellent variety, very productive, large and sweet, suitable for dessert as well as preserving.

Natsu Mikan.—The true grape fruit of Japan; about the same size as an orange; fruit rather flat, skin pale yellow. Grows in bunches and is very prolific.

CUMQUATS.

Price 2/- each.

This fruit makes delicious Marmalade.

LEMONS.

Price 2/- each; 22/6 dozen.

Eureka.—A very good variety, in every respect like Lisbon, but trees almost thornless.

Genoa.—An Italian variety, entirely without thorns; fruit very large and juicy.

Lisbon.—The well-known favourite that has proved to be unexcelled.

American Seedless.—A good lemon of medium size, with very thick skin.

Villa Franca.—A summer bearing tree. A strong, vigorous grower, with few thorns; fruit oblong, thin-skinned and firm.

Sweet Rind.—A variety well liked for first quality fruit; grows to a good even size. This is a good summer-bearing variety and one of the most profitable to plant.

LIMES.

Price 2/- each.

Tahiti.—A strong grower and heavy cropper; fruit nearly the size of a Lisbon lemon; exceedingly thin rind, juicy and nearly seedless. For hot districts it is considered superior to the lemon.

Stone and Deciduous Fruits

ALMONDS.

Price 1/6 each.

- Brandes Jordan.**—A well-known almond of strong growth, nuts large and sweet; soft shell.
- Ne Plus Ultra.**—Extremely prolific, producing its nuts in bunches all over twigs; nuts large and long; fine flavour.
- New Nonpareil.**—A heavy and regular bearer, with very thin shell; large and sweet.
- Paper Shell.**—Very good, and easily broken between the fingers.
- White Nonpareil.**—The tree is a strong grower of spreading habit, nuts very large with white shell, a far heavier bearer than "Brandes Jordan."
- And many other varieties.

APPLES.

Price 1/6 each.

(Grafted on Northern Spy Stocks).

- Ben Davis.**—An apple of medium size, nice colour and of excellent flavour; suitable for market.
- Canvade.**—An ideal apple for dessert purposes; a heavy cropper and delicious flavour.
- Five Crown.**—Fruit medium size, skin greenish yellow with brownish cheek; good cooking or dessert; fruit keeps well.
- Granny Smith.**—A large juicy apple of a greenish yellow colour; late and a heavy bearer.
- Gravenstein.**—A splendid apple, good flavour and colour; flesh rich and juicy. Excellent quality.
- Gruning.**—An excellent apple for dessert or cooking; a most suitable variety for Brisbane and north coast district.
- Johnathan.**—Splendid striped red colour; abundant bearer, crisp and juicy; highly recommended for extensive plantations, and most valuable for export; late.
- Lady Carrington.**—Beautiful bright red, very prolific and said to be blight-proof; early.
- Lord Nelson.**—Enormous size, skin clear lemon yellow, shaded and splashed with a clear, bright red; a cooking apple.
- Munroe's Favourite.**—Fruit of large size and roundish; skin clear yellow with a reddish brown cheek. A late-keeping apple of first quality and a good shipper.
- Nickajack.**—Large, roundish; skin yellowish, striped and splashed with two shades of red; valuable as a pollinator.
- Rome Beauty.**—Fruit large and handsome; skin yellow shade and striped with bright red; flesh yellowish, tender and juicy.
- Twenty Ounce.**—Fruit medium to large; skin smooth greenish yellow, with a beautiful red cheek; flesh white, tender, with a pleasant sub-acid flavour; good cooking or dessert.
- And many other varieties, particulars of which we will be pleased to give on application.

APRICOTS.

Price 1/6 each.

- Suitable only for Cold Climates; not much good for Brisbane and District.
- Blenheim.**—Fruit largest, a little pointed; skin clear yellow, bright red cheek; flesh deep orange.
- Camden Superb.**—Large, oval; skin pale yellow, bright red in the sun; flesh pale, very meaty.
- Early Moore Park.**—Fruit large; skin yellowish green, brownish red on the sunny side; flesh bright orange. A popular variety for market.
- Elruge.**—Flesh firm and juicy; fruit always large; one of the best to grow.
- Large Early.**—A favourite variety; vigorous grower, which ripens early.
- Moore Park.**—A variety of good quality; flesh rich and juicy, excellent.
- Newcastle Early.**—A very fine variety; fruit of fine yellow colour, and a heavy bearer.
- Oullin's Early.**—Large, skin deep rich yellow, flesh orange; very rich.

FIGS.

Price 1/6 each.

- Figs do well in a moist situation; they are not particular as regards soil, but require manuring during their growing season.
- Black Genoa.**—Dark skin and red flesh, large juicy and rich.
- Brown Turkey.**—A quality of fruit hard to beat; very suitable for our climate and can be recommended.
- Brunswick.**—Very large, rich and excellent.
- White Adriatic.**—A very rapid grower; tree grows to a large size and is a heavy cropper; absolutely the best fig yet introduced.
- And several other varieties, particulars of which will be given on application.

LOQUATS.

Seedlings 1/6 each. Grafted 3/6 each.

- Loquats are a most useful fruit, coming in before most other fruits are ripe.
- Giant.**—A loquat of very large size, possessing few seeds; has a beautiful flavour.
- Herd's Mammoth.**—The best of all loquats; very large.

MULBERRY.

- Cape.**—Very strong grower; very suitable for culinary purposes; suitable for local planting. 1/6 each.
- Black English.**—Perhaps the best variety grown; highly recommended for the colder parts of the State. Not suitable for local use. 2/6 each.

NECTARINES.

Price 1/6 each.

- Albert Victor.**—Large, yellowish white, with a carmine blush; a freestone.
- Camden Superb.**—Originated from Stanwick, which it strongly resembles, but excels it in size.
- Cooza.**—Its grand size, coupled with its splendid colour, should alone recommend it; it is a freestone.
- Lady Carrington.**—A large and very showy variety; a clingstone.
- Early Rivers.**—Fruit of large size; rich, crimson skin on side next to sun; light yellow, marked with red on shaded side; flesh is tender, juicy and very early.
- Gold Mine.**—A nectarine of enormous size; a perfect freestone; the pip or stone being very small for so large a fruit.
- Hunt's Tawney.**—Medium, dark purple; flesh yellow and of superior flavour; very prolific and early.
- Illawarra.**—A nectarine of very good size and bright red colour; ripening early; a highly valued market variety.

PEACHES.

Price, 1/6 each; 15/- per dozen.

VARIETIES SUITABLE FOR COASTAL DISTRICTS.

FRUIT RIPENING FROM END OF OCTOBER TO END OF JANUARY.

- Beauty of Booroodabin.**—An ideal peach of the freestone family; which was raised in the State; it is extra early and of superior quality; very suitable for local use.
- Early Crawford.**—A splendid yellow and crimson-coloured peach; good for jam, canning or dessert; medium.
- Early Newington.**—The finest peach for around Brisbane; especially adapted for dessert or preserving; flesh melting, rich and luscious; clingstone.
- Imp. Flat China.**—Extra early, of large size and exquisite flavour; superior to all others.
- Remlet.**—A very prosperous variety; fruit sweet and of medium size. It is very early and is a heavy cropper.
- Croft's Early.**—A locally raised peach, very early and prolific bearer; most suitable for local or coastal areas. Highly recommended.

VARIETIES OF PEACHES SUITABLE FOR THE COLDER CLIMATES.

FRUIT RIPENING NOVEMBER AND DECEMBER.

- Bell's November.**—A very fine variety, in appearance closely resembling Brigg's Red May.
- Brigg's Red May.**—The standard of extra early peaches; fruit medium and roundish; skin whitish green in the shade, bright red in the sun; flesh tender, very rich and juicy; freestone. A very profitable market peach.
- Foster.**—Fruit of large size; side slightly flattened; skin a deep orange red, very deep red cheek in the sun; flesh yellow, very rich and pleasant, with a sub-acid flavour, a grand freestone.
- Hale's Early.**—A really first-class peach which always brings top market price; early.

Royal George.—A peach highly prized among orchardists; is very suitable for cold districts, and is noted for its exquisite flavour.

Sneed.—Medium, creamy white, striped with carmine; freestone, ripens about eight days before Early Alexander.

The following are late varieties of Peaches, ripening from February to April:—

Delicious.—Yellow with minute carmine dots; flesh yellow, stone small; a sure cropper. Freestone.

Globe.—Large and quite round; a bright gold colour, with a deep crimson cheek; a free-stone; yellow flesh, good.

McDevitt's Late Cling.—The finest peach of its class; size enormous; good shape, colour rich yellow covered with dark purple, in perfection in February. A good canner.

PEARS.—Grafted.

Suitable for the Colder Climates.

Price 1/6 each.

- Bailey's Bergamont.**—Medium size, in shape like Gansell's, but a month later and a more certain cropper.
- Bon Chretien.**—Most suitable for cool districts; a good market variety.
- Clapp's Favourite.**—Very large and richly flavoured; a grand early pear.
- China or Cooking.**—Suitable for preserving or stewing; very firm fruit; heavy cropper.
- Garber's Hybrid.**—A very prolific variety, fruit yellow, said to be the best for our climate.
- Keifer's Hybrid.**—Cross between William's Bon Chretien and China; superior flavour; very prolific.
- Leconte.**—Large fine fruit; vigorous grower and prolific cropper; a very desirable variety.
- Packham's Triumph.**—A greatly improved W. B. Chretien coming in after that variety is over; fruit very even in outline and of superior flavour. A variety which cannot be too highly recommended, either commercially or for private use.
- Winter Cole.**—Medium size, almost round; skin pale yellow, with a little russet; flesh yellowish; one of the finest and richest pears.

PLUMS.

(Grafted on Peach Stocks).

European and Japanese.

Price 1/6 each.

Burbank.—Said to be the best of all Japanese plums. The fruit is nearly globular, of a clear cherry red colour, with a thin lilac bloom. The flesh is of a deep yellow colour, with a peculiar and very agreeable flavour.

Kelsey.—Extra large, enormous cropper; skin greenish yellow, covered with purple bloom when ripe; good market variety.

October Purple.—A very large black-purple heart-shaped plum, with no splashes of lighter colour; flesh amber yellow, red beneath the skin; very juicy, but firm; sweet and of most delicious flavour.

Satsuma.—A very large preserving plum; blood red right to the stone; enormous cropper.

Early Orleans.—Medium size, oval; skin dark red, purple in the sun; flesh yellowish green; a freestone.

President.—We consider this the best acquisition in this class of fruit. Large, oblong shaped; over two inches long, and of a beautiful colour; flesh firm and sweet; a perfect freestone.

Early Jewel.—This is one of the earliest plums to ripen, resembling October Purple; good flavour; an enormous cropper of even sized fruit; tree very vigorous.

CHICKASHAW PLUMS.

(Grafted on Peach Stocks).

(Suitable for Coastal Districts).

This is a species immune to the fruit fly, in that respect it is not subject to disease, and, therefore, most suitable for our Queensland climate, especially the hotter parts.

Angelina Burdett.—Above medium, round, dark purple, flesh yellowish, very juicy and rich; a freestone; enormous cropper.

Excelsior.—Perhaps the best of its kind. The fruit is inclined to be round, black in colour and is of delicious flavour. It is very prolific and an extraordinary strong grower.

Helm.—A magnificent plum, producing extraordinary heavy crop; ripens early.

Howe.—An excellent variety, being a heavy cropper, and having a delicious flavour. We can thoroughly recommend this species for home culture as well as market cultivation.

Milton.—A very choice plum; very nicely flavoured.

Newman.—A plum similar to Wild Goose, only that the fruit is small.

Robinson.—A splendid variety, which is very prolific; flesh yellow; skin reddish.

Wild Goose.—A well-known variety which produces heavy crops; very juicy and luxurious when ripe.

QUINCES.

Reace's Mammoth.—Large fruit of good quality; very suitable for preserving.

Large Portugal.—One of the very best varieties; very late.

Master's Early.—An extra early variety of good quality, large fruited.

PERSIMMONS, or Date Plums.

Price 2/6 each; or 25/- dozen.

Dia Dia Maru.—Fruit of the largest size; square or four-sided, rather flattened; skin deep orange; flesh yellow; almost seedless; fine variety and early.

Hiyakume.—An early variety; fruit conical shaped and large in size; colour pale yellow; flavour unsurpassed.

Flat Seedless.—A fruit of good quality; heavy bearer; one of the best seedless varieties.

Nightingale.—Very superior, fruit cone shaped, heavy cropper, dwarf growing tree; can be recommended.

Tanenashi.—A seedless variety of good merit; yellow, oblong and rich in flavour.

Yemon.—Large round variety, inclined to be flat; seedless, colour yellow, with rose colour.

CUSTARD APPLES.

(Chermoyer or Custard Apple).

Grafted 3/6 each.

Bullock's Heart.—This is very similar to Giant, but is not quite so large; fruit is of excellent flavour.

Giant.—Extra large and of excellent flavour; without doubt the best.

Island Smooth.—Fruit of medium size and very smooth; a prolific bearer.

CHERRIES.

Price, 2/6 each.

(Suitable only for very cold climate).

Early Lyons.—Fruit very large; skin deep red in the sun; flesh red, very juicy, firm and very solid.

Florence.—Large, roundish, heart-shaped; pale amber, nearly covered with bright red; flesh amber, very firm.

Knight's Early Black.—Large and heavy bearer; early.

St. Margaret.—Very large, black and firm; one of the best market varieties.

GRAPE VINES.

Price 1/- each; 10/- per dozen.

Our stock is strong, healthy, and well rooted. The following varieties are strong growers and heavy bearers.

Chouch.—A splendid table grape, very early; amber colour.

Black Prince.—Bunches long and generally without shoulder; berries above medium, oval; skin thick, deep purple black; flesh tender and very juicy.

Doradillo.—This is one of the best-known varieties, producing large fruit of beautiful amber colour.

Gros Colman.—Bunches very large, berries large and round, skin dark purple or black; flesh juicy and sweet, with an agreeable flavour.

Hamburg.—A well-known and popular table grape; bunches large to medium; heavily shouldered and well set; berries deep blue-black; flesh rather firm but tender, rich and sugary.

Iona.—A well-known variety; very useful as a table grape; amber colour; peculiar in flavour.

Isabella.—The best known American grape; makes good wine or jelly.

Royal Ascot.—Bunches of medium size; berries purple colour; early.

Snow's Muscat.—Bunches large; berries very large, rather oval, sometimes almost round; skin deep purple; flesh very juicy, with a rich and distinct muscat flavour. Perhaps the best of the black muscats.

Sweetwater.—Bunch medium size; berries round greenish white; an old favourite; early.

White Syrian.

Wilder.—Large bunches, large round berries; very productive, also many other varieties.

Lady's Finger.—Black or white.

MISCELLANEOUS FRUIT TREES, ETC.

Coffee of Commerce.—A most useful evergreen; grows best on a well drained soil. Berries, when roasted and ground, are ready for commercial use. Price, 1/6 each.

Cherry.—Brazilian. This is a very nice shade and ornamental, as well as useful, fruit tree. It grows very rapidly and is always evergreen. Price, 2/- each.

Flacourtia Catafracta.—This is a very pretty ornamental and shade tree. The fruit resembles a small plum, and is edible; excellent for making jelly. Price, 2/- each.

Guavas.—Strawberry, Cherry, Gooseberry, Common or Large Yellow. Price, 1/6 each.

Jack Fruit.—A very ornamental evergreen, producing large fruit, sections only of which are eaten; delicious flavour; highly recommended. Price, 2/- each.

Monstera Deliciosa.—A semi-tropical fruit of a semi-climbing habit. It will grow successfully where it is not subject to heavy frosts. Fruit possesses a very nice flavour, and is becoming more popular. Plants can be grown in large pots or tubs and used for decorative purposes. Price 2/6 each.

Mangoes.—We have several varieties of this very popular tree. It is most suitable for both town and country gardens, as well as a shade tree in the open. Our trees are noted for the lusciousness of their large attractive fruit. Strong plants in pots. Price 2/- to 2/6, according to variety.

Pineapple Suckers.—No matter how small or how large your order we can fill it. We have the following varieties:—The Queen, Ripley Queen and Smooth Leaf. Price 3/6 per dozen; 12/6 per 100. Special quotations for larger quantities.

Pomegranate.—This is a very useful flowering as well as an ornamental fruit tree. It is a medicinal fruit which is valuable in many respects. Price, 2/- each.

Queensland Nut.—This is a native of Queensland, and of recent years has found its way into America, where the nuts are much valued and relished in the same way as Almonds and Brazilian nuts. The flavour and nutritious qualities of this nut will, in due course, create a demand which should eventually place it in the front rank as a commercial product. Price, 1/6 each.

STRAWBERRIES.

Phenomenal Aurie Glenfield Beauty.—Price 5/- per 100; 50 for 3/-. Special quotations for quantity.

CURRENTS.

All the best varieties in Blacks, Reds and Whites. Price, 1/- each; 10/- doz.

GOOSEBERRIES.

English, 1/-; 10/- doz.

VERY IMPORTANT NOTICE.

PLEASE ADDRESS ALL CORRESPONDENCE TO

Petersen's Acacia Florists

(Harry A Petersen, Manager),

O.K. BUILDING, 117 QUEEN STREET, BRISBANE, Q.,

or Box M 996 G.P.O., Brisbane.

WE HAVE NO CONNECTION WITH ANY OTHER FIRM OF PETERSENS.

Grasses, Farm Seeds, Roots, Etc.

SUDAN GRASS.

Valuable Forage Crop.

Sudan Grass is a tall annual grass, and under average conditions grows to a height of about six or seven feet. It may be sown broad cast or planted in drills 30 or 36 inches apart. If planted in drills, 6 lbs. of seed per acre would be sufficient. It should not be planted until the ground is thoroughly warm, but in order to allow a greater cutting of hay, seeding should be done as early in the season as possible.

The crop should be cut for hay as soon as the grass is fully headed, and early cutting is advisable where two or more cuttings are required. If left for seed, it should be cut as soon as the greater portion of the seed is ripe.

Sudan Grass is a great hay-producing crop, both in quality and yield, and is without doubt one of the greatest drought-resisting forage crops known. At the same time it does not blight where the moisture is heavy, and recovers rapidly after cutting, the next crop usually being ready for harvest within thirty days from first cutting.

During the last two years, there have been many areas planted with this valuable grass, and from reports to hand we are inclined to believe that it will prove one of the most valuable grasses yet introduced. Seed we offer is prime, machine cleaned and free from Johnson Grass. Price on application.

PASPALUM DILITATUM.

This wonderful fodder grass has proved one of the most valuable grasses yet introduced into Australia. It is most serviceable for low-lying ground, and flat cultivations; as a matter of fact, it will thrive almost anywhere providing it gets a little moisture during the growing season. 5 lbs. of seed will plant an acre. Price and sample on application.

RHODES GRASS.

We carry large supplies of this valuable and useful grass. It is excellent for forest country, stands drought and is an invaluable horse as well as cattle feed. Samples and price on application.

COUCH OR DOOB GRASS.

This is, without doubt, a most valuable pasture grass, as many pastures where it abounds would be comparatively useless without it. As a Summer grass it has no equal, as during the hottest weather it has always a green appearance.

SORGHUMS AND MILLETS FOR GREEN FODDER.

Most useful forage plants producing enormous crops on any well-worked average soil, during the hottest months, and on rich alluvial land yield enormous crops.

Can either be cut green for fodder or ensilage, or ripened and cut into chaff.

Early Amber Cane.—Very early.

Planter's Friend (brown seed).—Wonderfully productive.

Kaffir Corn (*Sorghum Tartaricum*).—White and red seeded, grown principally for fowl feed.

Hungarian Millet.—Excellent for green fodder and hay. 3 feet to 6 feet only. 10 lbs. per acre, in drills or 20 lbs. broadcast. Special prices on application.

Japanese Millet.—One of the finest fodder plants, of rapid growth, yielding large quantities of green fodder. Drought-resisting.

White Panicum.—This variety is similar to Japanese millet, but it yields much heavier. It is an excellent green fodder, and most valuable for fattening sheep, etc.

Culture.—The land should be deeply ploughed, harrowed and rolled, and lightly harrowed a second time. Sow seed in drills 3 feet apart; at the rate of about 12 lbs. per acre, or 20 lbs. broadcast. September, October, November, and December are the best months for sowing.

SACCALINE (or Honey Sorghum).

This particular variety of sorghum is much in demand. It can be used almost in any stage, but its best properties are proficient when the seed heads are well developed. Price on application.

PRAIRIE GRASS.

(*Bromus Unoloides*).

Perennial. Height, 2½ft. to 3ft.

This is one of the most nutritious of fodder and pasture grasses. It produces enormous crops, and can be cut four or five times a year providing it is not allowed to go to seed. It succeeds well in almost any soil but prefers that which is wet or moist. Stock will eat it greedily, either in the green or dry state. A small proportion of it is valuable in mixtures, but upon the whole it is best alone. The demand for this grass increases year by year, proving that it will repay cultivation. Sow (if alone) 40 lbs. to the acre.

Price according to market.

PERENNIAL RYE GRASS.

(*Lolium Perenne*).

Perennial. Height, 1½ft. to 2ft.

This is one of our most largely cultivated and valued grasses. It adapts itself to almost any soil, germinating freely from seed, is easily propagated, and seeds abundantly. It is of upright habit, bearing abundance of nutritious foliage, which is at all times relished by stock; it stools out freely, but does not grow in tufts; its roots are fibrous and penetrating, giving it a permanency that does not belong to many others. Sow (if alone) 40 lbs. to the acre.

ITALIAN RYE GRASS.

(*Lolium Italicum*).

Biennial. Height, 1½ft. to 2½ft.

A valuable biennial variety, which succeeds well in almost any soil. It yields an abundance of food in the early Spring. A little is sometimes introduced into permanent pastures on account of its early growth. Sow (if alone) 40 lbs. to the acre. Price according to market.

LUCERNE, BROAD LEAF.

(Hunter River).

Our supplies of this seed are obtained from the most reliable growers in the Hunter River district of N.S.W. The seed is machine dressed and thoroughly clean from foreign seeds and dodder.

Price on application.

FOR FARM OR GARDEN—
PETERSEN'S SEEDS
HAVE VERY FEW EQUALS AND
NO SUPERIORS.

CLOVER.

All Clover Seeds may be sown from May to the end of July.

White Dutch Clover (*Trifolium Repens*).—Is found to succeed admirably all over the colony; and in some parts it seems to be almost indigenous; it suffers during dry seasons, but springs quickly after the first rain. It is an excellent pasture grass, forming, in conjunction with Cocksfoot, and Rye Grass, the finest and most nutritious food for stock. It succeeds well on all rich, clayey lands, if not too wet, and should be introduced into every pasture. Quantity required to sow an acre, 14 lbs.

Alsike, or Hybrid Clover (*Trifolium Hybridum*).—A giant variety of White Clover, slightly tinged with pink. It will be found valuable for permanent pastures; very hardy, and will thrive on any soil. Quantity required per acre, 14 lbs.

Gow Grass, or Perennial Red Clover (*Trifolium Pratense Perenne*).—This variety yields very heavy crops, and is most suitable for cutting. It is found to succeed best in the colder parts of the colony; deep cultivation is wanted for the crop, and it will give large returns. 14 lbs. required to sow an acre.

SELECTED SEED MAIZE.

Owing to market fluctuation, it is difficult to fix prices. We make a point of offering graded samples where possible, and in that respect we will be pleased to post samples and quotations on application.

Improved 90 Day.—One of the finest Maizes, very early, deep grain, and a heavy cropper.

Hickory King.—A large grain, yields well, excellent for green feed.

Ninety-Day.—A variety in large demand for green fodder.

Early Leaming.—This is perhaps the best of all the early-maturing varieties and for the Downs it is best.

Yellow Horsetooth.—A standard variety, producing excellent crops in suitable districts. The grain is light, but at the same time it is a heavy cropper.

Quotations for other varieties on application.

Culture.—A fine, rich, black chocolate soil, not too sandy, is the very best for a maize crop. The land should be ploughed deeply, rolled, and a light harrow should be passed over it before planting. Sow 15 to 16 lbs. for seed crop in drills 3 feet to 4 feet 6 inches apart. For a green crop sow broadcast—say a bushel per acre, or ¼ bushel in drills. Ninety-Day or Hickory King are best for that purpose. Keep land well scarified between rows, especially during dry weather; kill weeds, and sow from end of September to Christmas.

COWPEA or CATIANG BEAN.

The Cow Pea does well and produces large crops of first-class fodder during dry seasons, and stock of every kind are particularly fond of it. It has great value as a green manure, and, like all leguminous plants, it takes nitrogen from the atmosphere and deposits it in the soil during growth.

White. Black. Clay Coloured.

Special quotations on application.

MAURITIUS BEANS.

For green manure they are Nature's great fertilizer. They enrich the soil with nitrogen both in the growing state and when ploughed in.

TARES or VETCHES.

Golden and Large Black.

Both varieties may be sown broadcast, at the rate of a bushel or a bushel and a half to the acre, and half or a whole bushel of rye or barley may be sown with them. The latter keeps the Tares off the ground and helps to produce a better and heavier crop.

Special price for large quantities on application.

SWEDE TURNIPS.

Imperial Purple Top Swede.—Splendid heavy Swede; fine shape, excellent quality, and keeps well.

Skirving's Purple Top Swede.—Heavy cropper and a well-known variety.

Kelway's Purple Top Swede.—Hardy and a good keeper.

Petersen's Champion Purple Top Swede.—Fine shape and heavy cropper.

Culture.—Any rich, strong land, if well ploughed, harrowed and rolled, will produce fine turnips. The best time to sow Swedes is January or February, although some prefer an earlier or later sowing. Sow in drills 4 feet apart, and thin the plants to 18 inches apart; 2 to 3 lbs. of seed will sow an acre.

Special prices for large quantities.

REMEMBER !

It costs no more to grow the best.

CHEAP SEEDS

or plants are the most expensive in the long run.

Our motto is Quality.

RYE (Common).

Culture.—This excellent forage plant will grow on poor or rich land, can be sown alone or with Tares, comes quickly to maturity, and yields most nutritious green fodder. It is also grown for its straw, which is straight and strong. Sow from March to July, broadcast: 1 bushel per acre.

Price on Application.

SUGAR BEET.

Vilmorin's Improved, White.

Klein Wanzleben, White.

This root crop makes an excellent food for dairy cattle and pigs, and yields heavily.

Culture.—The cultivation is much the same as that of Mangel Wurzel, but the plants should stand closer in the rows.

MANGEL WURZEL or MANGOLD.

No dairy farm should be without a few acres of this most valuable root crop. It greatly adds to the quality of milk, and can be stored for many months if required. It is useful also for feeding cows and pigs. The Long Red and Yellow Globe are the varieties most esteemed.

Mammoth Long Red.—Best variety for deep, well-worked, rich land.

Long Yellow.—Excellent for deep, rich, strong soil.

Yellow Globe.—Most suitable for shallow soils; keeps well.

Half Long Sugar, White.

Half Long Sugar, Pink.

Culture.—Good, strong, and deeply-worked soil will produce the heaviest crops; the land should be ploughed deeply twice, scarified, rolled, and harrowed lightly. Sow in drills 4 feet apart, and thin to 12 to 18 inches between each plant; 3 to 4 lbs. of seed is sufficient for an acre, and soaking the seed in warm water for 24 hours will hasten germination. January to March, also in the spring, are the best months to sow.

**OUR FARM SEEDS ARE SPECIALLY
SELECTED, MACHINE CLEANED, and
FREE FROM NOXIOUS WEEDS.**

FARM CALENDAR

Approximate times for sowing are denoted by

† For moderately warm climates where Oranges thrive.

* For cool climates, say where English Fruits thrive.

The most suitable times for sowing are very largely influenced by local conditions and seasons, and these and any local experience available should always be taken into consideration.

What—When—and How to Sow.

NOTES FOR JANUARY.

This is a good month to sow Anemone and Ranunculus seed for spring flowering; also Iceland Poppies (in shady positions), Schizanthus (Poor Man's Orchid), Primulas, Cinerarias, Pansies, Stocks, Lupins, also our very choice strain of Gerberas. This is also a suitable time to put in some of the most beautiful of the Flowering Bulbs. See below for list of these. Asters will need copious waterings as they come into flower. A dusting of lime or tobacco dust or arsenate of lead spray on the plants will check the Aster grub. Dahlias, Chrysanthemums and Bouvardias will need attention in the way of pinching out laterals, and regular waterings with occasional applications of weak liquid manure. It is a good plan to vary the kind of manure and take care to apply after watering. Roses which have been at rest may be cut back and well watered. They will then bloom in the Autumn. First sowings of Sweet Peas may be made this month.

VEGETABLE GARDEN.

Cauliflowers should be sown if not already put in; also Cabbage for succession. Any of the Vegetables mentioned below can be planted if the weather is favourable. Keep all the beds well and continuously cultivated to conserve moisture and kill the weeds. This is more effective than continuously watering the surface. A good soaking once a fortnight, followed by the hoe, will be found quite sufficient, especially if the land is mulched with well rotted manure, leaves or other loose material. Dig deeply and leave in rough condition for summer and fallow any unoccupied ground; if an application of carbonate of lime or hydrate of lime can be given at the same time, so much the better.

WHAT TO PLANT.

GROW MORE VEGETABLES—

But to ensure success, procure
your supplies of seeds from
PETERSEN'S "ACACIA FLORISTS."

NOTES FOR FEBRUARY.

Generally this is the best month to make main sowings of Pansies, Stocks, Lupins, Sweet Peas, Nemesis, Cinerarias, Iceland Poppies, Primula, Malacoides, etc., also our choice strain of Gerberas.

During this month the main attention will be given to the watering of the Asters, Dahlias, and Chrysanthemums. These latter two should be severely disbudded now if fine flowers are desired. Quality, instead of quantity should be your motto, and they should be encouraged to make strong growth by watering with weak liquid manure every week or ten days. This should be given when the ground is moist; and also should be alternated with soakings of fresh water. Petunias, Phlox, Salvias, Sunflowers, Zinnias and other Summer Flowering Annuals will now be making a great show and should receive the same treatment, and the dead flowers and seed pods picked off. Treat the Roses in the same manner, and they will also keep flowering. Roses also that have been resting may be pruned back and well watered to induce a crop of bloom in the autumn.

Treated in this way, Roses may be had in flower almost all the year round. Belladonna Lilies, Crinums and Lycoris, if well watered, will immediately rush into flower. This is the time to order Spring Flowering Bulbs for March planting.

VEGETABLE GARDEN.

Last sowing may be made early in February of French Beans and Wax Beans, while for Swede Turnips this is the main planting month. Any of the varieties mentioned below may be put in if the weather is favourable. It is well to put in a good planting of Seed Potatoes if matured sound seed is available. Cauliflowers and Cabbages should be transplanted to permanent beds as soon as ready and weather suitable.

NOTES FOR MARCH.

This is one of the busiest times in the year. As the Aster beds go out of flower, clear the old plants away and dig deeply in preparation for replanting. The following are suitable to follow on: Cinerarias in shady beds where severe winter frosts are not experienced; Stocks in sunny, well-drained situations; Pansies, Daisies, Dianthus, Margaret Carnations, Nemesis, or almost any of the hardy annuals mentioned below. In sowing these seeds, it is as well to refer to us. Those which do not transplant easily should be sown in the permanent borders. A main sowing of Sweet Peas should now be sown in a well-prepared bed.

As the Dahlias and Chrysanthemums come into bloom cease giving liquid manure, but keep them watered and shaded. Now is the best season to plant the beautiful Spring Flowering Bulbs, which are listed in general bulb list. Some of these do not thrive permanently in very hot climates, but they nearly all do well about Brisbane. The cost of them is so small that every garden should have a collection of these lovely harbingers of Spring. Daffodils, Hyacinths and Freesias make lovely pot plants, and are quite easy to grow in this way. Carnation plants should now be ordered; this is the month to plant; also Roses, Ornamental Shrubs and Citrus Fruit Trees may be put out towards the end of the month, as soon as the plants are in condition for lifting.

VEGETABLES.

Main sowings of the hardier vegetables, including Broad Beans, Onions, Lettuce and Peas, may now be made. Onion seed beds should as far as possible be free of weeds. Clear the land of old crops as they mature, and roughly dig for Autumn fallow, if not wanted for immediate use.

WHAT TO PLANT.

VEGETABLE SEEDS.

EACH 6d. per packet. Post Free.

(Except Peas and Beans, on which postage is extra at Peas, 4d.; Beans, 3d. for each packet).

Beans (Broad)	Onions (All varieties)

PLANTS.

Camellias	Violets
Carnations	Citrus Fruits.
Fuchsias	Lawn Grass
Gerberas	All Evergreen Shrubs

Our Rose Trees are the finest in the State, well grown, true to name, and nicely rooted.

We pay particular attention to the packing of country orders.

NOTES FOR APRIL.

If the various Flower Seeds recommended to be sown in March have not been planted, they can still be sown, but should be got in before the end of the month, while the ground is still warm. This is a good time to plant out Anemones, Ranunculus, Pansies, Stocks, etc., giving them an opportunity to become established before the ground becomes cold.

Early sown Sweet Peas should now be throwing out their tendrils and should be supported in their early stage. A weak spraying of Lime and Sulphur will keep down fungus and other diseases.

Keep a close eye on young Stock Plants for insect pest, particularly the green aphid which appears on the undersides of the leaves. Weak sprayings of Arsenate of Lead or Nicotene will keep these plants clean.

This is the best month for putting out Roses, Evergreen Shrubs and Ornamental Trees; also Citrus Trees in the orchard; also such plants as Carnations, Pentstemons, Pelargoniums, Violets and Strawberries should be put in. Plants put in during April take root rapidly and become established before the winter.

VEGETABLE GARDEN.

In the vegetable garden make another planting of Broad Beans; also Salad Plants, and a main sowing of the various Onions. Potato Onions, Tree Onions, and Shallots can also be planted now. Dig deeply all vacant land, adding a good dressing of manure, in preparation for early spring planting, and always incorporate the summer mulch with the soil.

PLANTS.

Evergreen Shrubs
Citrus Fruits
Lawn Grass
Strawberry Plants

It costs no more to grow the best.
CHEAP SEEDS
or plants are the most expensive in the
long run.
Our motto is Quality.

NOTES FOR MAY.

The various seedlings sown in March will be now growing rapidly and should be carefully tended. If too thick, thin out or transplant into boxes. Sturdy plants can only be grown by affording them space, light and air while they are young. As soon as large enough to transplant, they should be put out in their permanent quarters. Pansies, Stocks and Cinerarias should also be planted out without delay. May is the best month to plant Roses, though they may be put in any time up to August. This is the time to order any Roses required to fill up vacancies or to make new beds. They can be safely sent per parcel post. Carnation Plants also should now be planted, if not already in. They do much better planted now than in the Spring, and better quality plants can be supplied. This is the month to order Violets and re-make old beds. Planted now, they become established at once. Pelargoniums and Pentstemons may also now be planted, but they will succeed any time till early Spring.

Deciduous Fruit or Ornamental Trees may now be ordered. The earlier they are planted in the winter the better. Early orders receive the pick of the supplies. Also Asparagus and Rhubarb may now be planted. Strawberry beds should be planted before the end of the month, if not already in. A sowing of Early Peas may be put in.

If obtainable, now is a good time to order Potato Onions, Tree Onions, and Shallots.

Our Catalogue contains the Finest and Most Select List of Vegetable and Flower Seeds ever offered. Keep a copy by you throughout the year.

Place your order for Rose and Fruit Trees this month (May).

We stock only the best. Our prices correspond with the quality plants we sell.

NOTES FOR JUNE.

This is a good month to overhaul the garden generally. Primroses, Polyanthus, and Daisies can be divided and replanted. Dahlia Tubers should be taken out of the ground and stored in a dry place till the late spring. Another sowing of Early Peas for succession may be put in, choosing a well-drained bed. Now also is a good time to plant Asparagus and Rhubarb. Towards the end of the month and during July, the Fruit Trees and Roses should be pruned as soon as leaves fall, and receive their winter dressing of lime sulphur. The most suitable time for these operations depends on the climate, the warmer the climate, the earlier they should be pruned and dressed. In Brisbane the middle of July is considered the best time to prune Roses. Pruning tends to force Roses into fresh growth, and this is not desirable till the heavy frosts are over. Spray now for Leaf Curl on Peaches. In warm climates, free from heavy frosts, an early planting of Potatoes may be put in, choosing a warm situation. A few branches or twigs stuck in will afford all the protection necessary.

Hardy Annuals and Perennials, as they become large enough for transplanting, should be put out in the borders. Keep the borders weeded and free from snails with Snail Killer. This is the month for planting Roses and Deciduous Fruits and Ornamental Trees; also Evergreen Shrubs, and is a good time to dress the garden with bone dust.

All our Fruit and Rose Trees are grown under special contract. We guarantee all trees free from disease and true to name.

NOTES FOR JULY.

The planting of Roses and Deciduous Fruit Trees should be continued this month if possible. With Evergreen Ornamental Trees and Shrubs, and Citrus Trees, however, planting can be continued until August. The Pruning of Roses and Fruit Trees, and winter spraying them with lime sulphur to prevent leaf curl on peaches and other troubles, should be completed this month in all mild climates, say, where oranges thrive. In colder districts Rose pruning may be delayed till August. This is the month to put in members of the Lily family, choosing a position sheltered from wind; also bulbs of the sweetly-scented Tuberose.

VEGETABLE GARDEN.

Sowings under a frame in boxes can be made of Tomatoes for early plantings, but they will require protection till the frosts are over. Main plantings of Potatoes can now be made; also Jerusalem Artichokes, which are very heavy croppers, and will grow almost anywhere, requiring similar treatment to the Potato. Put in large sowings of Peas, choosing early and late varieties for succession. Transplant Onions. A sowing of these can still be made, choosing an early variety.

In the Flower Garden the various Annuals and Perennials in the seeds beds should now be transplanted to their permanent beds. Under a frame or in cool glass houses, sowings of the hardier sorts of plants (see below) may be made for planting out later. If the temperature is low delay planting till August. Bouvardias should now be cut back to within six inches of the ground, and mulched with manure.

NOTES FOR AUGUST.

The kinds of seeds that can be sown in this month depend largely on climate and situation. In some districts very few frosts are looked for in August, while in others they extend into September. Such plants as Melons, Early Cucumbers and Tomatoes will not stand the slightest frost, and require considerable warmth in the ground to bring them on. Usually these can be sown towards the end of the month if they are carefully protected from cold winds and are planted in a well-drained, warm situation. Main sowings of all the hardier vegetables may be put in as mentioned below, including Potatoes and Jerusalem Artichokes. Many Flower Seeds, as listed, may also be sown in the open ground if plants are not available from Autumn sowings. Several varieties of Flowering Plants mentioned below can be planted this month, also Ornamental Shrubs and Trees.

This is a good time to overhaul the glass house and bush house. Most plants want potting each year, and this is the best month to do it. Lawns can also be top dressed during August or September.

The best to grow:—Kleckley Sweet. Sweet Heart.

Tom Watson. Halbert Honey.

NOTES FOR SEPTEMBER.

A large number of the more tender annuals for summer bedding should now be sown in a sheltered seed bed. See below for list of sorts. We specially recommend the Large Flowering Petunias as one of the best summer bedding plants; also the hardy race of Begonia Semperflorens. This and October are the best months to sow Aster Seeds. The highly selected variety of Asters and Zinnias grown on our Seed Farm should be included in every garden and grown in quantity. Given a good water supply in dry weather, few flowers give such good results. From now on to November is the best time to raise all climbers from seed, and for a quick-growing annual variety we strongly recommend Mina Lobata, while for a perennial for a permanent position the Thunbergia Gibsonii (Golden Glory Vine), is eminently suitable.

Chrysanthemums may be planted out, but they will succeed any time till November. Tree Begonias may be planted now; they are one of the very best plants for growing under trees if the soil is well enriched and kept well watered. This is a good time to put in Ivy-leaved Pelargoniums (Geraniums). The newer varieties make a really ornamental feature of old fences, etc. September is one of the best months to plant Bouvardias, the other season being February, when the young plants are available. Now is a good time to plant out Gerberas.

VEGETABLE GARDEN.

In the Vegetable Garden almost everything can be planted this month. For an early crop of delicious Rock Melons sow such varieties as Rocky Ford and Early Hackensack, while for late use and long-keeping qualities Honey Dew Melon is the best. A sowing of Cucumbers should be made this month, and as an easily-digested, mild-flavoured sort, we urge home gardeners to try our recently introduced variety Apple-shaped.

WHAT TO PLANT.

VEGETABLE SEEDS.

EACH 6d. per packet. Post Free.

(Except Peas and Beans, on which postage is extra at Peas, 4d.; Beans, 3d. for each packet).

Artichoke

FRUITS.

Citrus
(all varieties)
Passion Fruit
Tree Tomato

Monstero Deliciosa
Granadilla
Mangoes

NOTES FOR OCTOBER.

Now that the warm weather is again with us, main sowings of all the more tender Vegetables, such as Cucumbers, Pumpkins, Melons, etc., may be made; and all varieties of Beans except Broad Beans. In the Climbing Beans Epicures are the best. All the varieties mentioned below, if not already planted, should be sown without further delay.

Chrysanthemums and Dahlias may be planted out. Put a strong stake to each plant as it is put in. Tuberous Begonias and Gloxinias will now be showing signs of growth and may be potted up. Salvias, Petunias, and other Summer Flowering Plants should now be sown. In planting out the Large Flowering Petunias it is advisable to plant rather closer than required, to allow for the pulling out of any odd plants not showing sufficient quality. Choose a sunny position for these; also for Salvias, Portulacca, Amaranthus, Celosia, Cockscorn and Zinnias, keeping the partially shaded borders for Asters, Balsams, etc.

This is a great time for weeds. Keep the hoe constantly going; this will conserve the moisture and help the growing plants. If the seed pods are regularly picked from the annuals their flowering period is much lengthened.

WHAT TO PLANT.

Honey Dew Melon.—Honey Dew means money to you. Superior to Rock Melon. Try these. Keep longer and of delicious flavour. Plant now.

NOTES FOR NOVEMBER.

The rush of spring bloom will now be over and the summer flowering plants can be transplanted from the seed beds to the borders. Where seeds have been sown in the borders they will require attention in thinning and watering. As the old flowering plants are removed the vacant ground should be deeply dug and a dressing of well rotted manure or thoroughly decayed vegetable matter from the compost heap incorporated with the soil. After planting, a mulching of similar material should be scattered on the surface to keep the ground cool during the hot season. Asters should now be put out as soon as large enough, choosing a partially shaded border, and should be sprayed with aresnate of lead, to prevent Aster grub in the heart of the plant. For sunny positions, Begonia Semperflorens, Salvias, Petunias, Zinnias, Broad-leaved Marigolds, Amaranthus, Celosias and Portulacca will make a grand blaze of colour throughout the summer; all climbers may also be sown this month. Roses will now have finished their Spring blooming. As the plants ripen their wood, and have had a rest, they may be slightly cut back. We suggest that this be a continuous process through December and January, a few plants each month. If they receive a heavy watering after this pruning they will rush into growth again and will bloom throughout the late Summer and Autumn. This does not apply to all Roses, some of which only bloom in the Spring, but is suited for Teas and Hybrid Teas.

In the Vegetable Garden a planting of Sweet Potatoes should be put in. The rooted plants are available at this season, and are readily obtained by post; also a further planting of Beans (except Broad Beans), for a continuous supply. All Vegetable Gardens should contain a row of Sweet Corn; plant now, choosing a rich soil. A sowing of Lettuce should be made for Summer salads; the Mignonette variety is recommended for trial.

WHAT TO PLANT.

VEGETABLE SEEDS.

EACH 6d. per packet. Post Free.

(Except Peas and Beans, on which postage is extra at Peas, 4d.; Beans, 3d. for each packet).

Beans (French and Wax)	Melons
Beetroot	Mustard
Capsicum	Peas
Carrot	Pumpkins
†Cauliflower	Radish
Cress	†Spinach
Cucumber	Squash
Egg Plant	Sweet Corn
Herbs	Sweet Potatoes
Leek	†Tomatoes
Lettuce	Turnips
	Vegetable Marrow

† Raise in Seed Beds.

Small sowings of the above should be put in for succession. Cultivated in this way and used in their young stage, delicious fresh Vegetables and Salads can be had all the year round.

PLANTS.

Begonias	Perennial Asters
Crysanthemums	(Michaelmas Daisies)
Dahlias (Green Plants)	Palms and Ferns

Chrysanthemums should be planted without delay.

Bananas	Passion Fruit
Guavas	Monstera Deliciosa
Custard Apple (Tropical)	Granadilla
Paw Paws (Tropical)	Mangoes

NOTES FOR DECEMBER.

This is especially the time for sowing Cauliflower Seed in the Vegetable Garden, and in climates where there are heavy winter frosts, the seed of Savoy or Curly Cabbage, Brussels Sprouts, Borecole or Scotch Kale, and Broccoli, should also be sown for winter use. We do not recommend them for warm climates. In the Flower Garden, this and January are good months to make an early sowing of Stocks, Iceland Poppies, Schizanthus (the Poor Man's Orchid), and Pansies; care should be taken with the planting of Iceland Poppies as they will not germinate at this time of the year unless planted in a cool shaded position. Keep Asters moving and dust with lime or tobacco dust to prevent grub. Dahlias are best planted in December. There is little else to be done in seed sowing or planting, but where a water supply is available the ground should have a soaking every week or ten days. If the surface is well mulched or constantly cultivated, this will keep all the plants moving. As the different crops come to maturity the land should be deeply dug and left in a more or less rough condition to allow the air free entrance. This Summer fallow will bring the soil into good condition for the Autumn crops. Roses that are resting may be slightly cut back and seed pods removed, as mentioned before, to bring them into fresh bloom. This is the month to dig Daffodils, Hyacinths and other Spring Flowering Bulbs. Store them in a dry place for re-planting in March. Carnations should now be cut back to within six inches of the ground and mulched. This will induce strong growth and winter flowers.

WHAT TO PLANT.

VEGETABLE SEEDS.

EACH 6d. per packet. Post Free.

(Except Peas and Beans, on which postage is extra at Peas, 4d.; Beans, 3d. for each packet).

from us. For variety see our special list.

A Choice Selection of Dahlia Tubers from **PETERSEN'S ACACIA NURSERIES.**

The following choice selection of Decorative and Cactus Dahlias we can thoroughly recommend. In the selecting of same we have chosen "stiff stem" varieties, which were grown at our own nursery under personal supervision. We, therefore, feel confident that buyers will be more than satisfied with our recommendation.

Full colour description and prices are found herein. See pages 36 and 37.

Dahlias of Quality

The "Acacia" collection of Decorative and Cactus Dahlias. We can recommend them. For colour and prices, see pages 36 and 37.
